“As a growth strategy, the company has aggressively started investing in the international generics market with successful ANDA and DME Europe, Australia, South Africa & Brazil. The company caters to the rest of the world markets through branded formulation sales.

The company aims to explore opportunities in the therapeutic areas such as Dermatology, Oncology, and Injectable Formulations. APL also has also co-promoted a company focused on discovery and development of innovative, small molecule drugs that target signal transduction networks and ion channels for the treatment of cancer, inflammation, autoimmune diseases and metabolic disorders.
