

MAHATMA GANDHI MEDICAL COLLEGE & HOSPITAL

A UNIT OF MAHATMA GANDHI UNIVERSITY OF MEDICAL
SCIENCES & TECHNOLOGY

Introduction

Mahatma Gandhi Hospital (MGH) was formally inaugurated on 2nd October 2000. At present this multi - specialty teaching hospital has **1400 beds**. MGH also provides adequate clinical teaching materials as envisaged by Medical Council of India, Dental Council of India, and Indian Nursing Council.

The world - class infrastructure with the **state- of- art** medical equipment and highly reputed and experienced medical consultants / doctors / paramedical staff of MGH provides clinical support to the faculty of medicine resulting into most efficient teaching in these institutions.

MGH has a fully developed central diagnostic laboratory in biochemistry, microbiology, and pathology. A well-trained and senior faculty supervises this lab which is one of the biggest in the State. MGH provides well-developed, unique services in the field of Advanced Reproductive Techniques (ART), medical and surgical endoscopy and modern blood banking with component therapy. MGH has started its Regional Emergency and Trauma Center approved for Medico Legal Cases (MLC) along with well - equipped ambulance facilities meant to save lives of the victims of road accidents. The efficient and effective emergency department is well equipped with intensive care therapy, diagnostics, radio-diagnostic including **ultrasonography** and **CT scan, MRI, Haematology and fully equipped operation theatres** manned by eminent professionals and experts round-the-clock. This is the first trauma centre in the state approved by the Govt. of Rajasthan to deal with medico-legal cases including road traffic accident and post-mortem under the Dept. of Forensic Medicine of MGMCH.

MGH has recently been upgraded with a state-of-art Cardiac & Critical Care Centre. The services at **Cardiac & Critical Care Centre** are available for patients by experienced Cardiologists & Cardiothoracic surgeons round the clock along with latest equipment's & ultra-modern technology.

The Hospital has a modern Kidney Transplant & Urology Centre namely Mahatma Gandhi Kidney Transplant Center which has started its functioning under expert Kidney Transplant Surgeons and Nephrologists. This centre gives quality medical services with ultra-modern techniques at affordable cost for all kinds of kidney ailments. A full-fledged Department of Oncology is launched with two linear accelerators for Radiotherapy services.

- General Medicine
- General Surgery
- Gastroenterology
- Genetics
- Gynecology & Obstetrics
- IVF & Reproductive Medicine
- Minimal Access Bariatric & Metabolic Surgery
- Neurosurgery
- Neurology
- Ophthalmology (Eye Care)
- Orthopedics, Arthroscopy & Joint Replacement-
- Plastic & Reconstruction Surgery
- Pediatrics
- Paediatric Surgery
- Psychiatry & Clinical Psychology
- Respiratory Medicine
- Radio-Diagnosis
- SKIN & VD
- Urology and Kidney Transplant
- Dept. of Forensic Medicine & Toxicology
- Dept. of Community Medicine

Key Activities/ Projects Undertaken Other than Dissertation

1. NABL: At the beginning of March, I took part in the NABL final evaluation for the central laboratory at MGH.
2. COVID Command Centre: During the months of March and April, the COVID Command Centre was instrumental in smoothing out and simplifying the admissions process, for which I was a key member and worked selflessly for the covid patients.
3. COVID-19 Vaccination: in the IVF centre Shakar Marg , a branch of MGH, I was the in charge of the vaccination drive.
4. We Care Project: Participated in an initiative called "We Care" for MGH patients. Where the hospital takes the outmost care of each of the patient, with close monitoring, initiating from the patient entry till the patient get discharged.

5. Ambulance Project: named mission MGH , with the aim of providing high quality transportation services from all the districts of Rajasthan , the role is to provide supervision and proper AI monitoring of patient during his transfer till the patient reaches MGH , after which we care team gets activated.

Key Learnings from Internship

New and improved skills and how to apply them:

Newfound knowledge is one of the most valuable things obtained during an internship. This involves learning how to complete activities relevant to we intended job path and honing the abilities we currently have.

Professional communications

It is challenging to adjust to working in a professional atmosphere for the first time. However, it is the most effective method to gain real-world experience and learn how to navigate the workplace. The capacity to communicate with people in a professional context is one of the most significant skills learned during an internship. Conversations with superiors or co-workers differ from those with lecturers or classmates.

Importance of Networking

Importance of ungluing oneself from the desk and to know other interns. This not only end up creating great memories and making friends but widen the professional network.

Taking constructive criticism well

Naturally, no one likes to be criticised and performance evaluations can be quite scary. probably making few mistakes and receiving constructive criticism about work from both the colleagues and boss.

But, that always remind oneself that it's not personal. It is for own good and growth and it will improve the quality of our work.

Independence

Often, we think being spoon-fed is the way to learn, but working independently has proved to be very important. Internship teaches you to make own decisions and do things on own.

Being able to work independently with little guidance is very important in the working world.

Making connections

In addition to the people who will be the references in the future, leaving internship with new connections: senior employees, clients, fellow interns, etc.

These people can provide guidance, advice and help in future job searches. Keeping them in the loop on where we are in our career, and offer to help them whenever possible.
