About Organization

CARE has been working in India for over 65 years, focusing on alleviating poverty and social exclusion. We do this through well-planned and comprehensive programmes in health, education, livelihoods and disaster preparedness and response. We also focus on generating and sharing knowledge with diverse stakeholders to influence sustainable impact at scale. Our overall goal is the empowerment of women and girls from poor and marginalized communities, leading to improvement in their lives and livelihoods. We are part of the CARE International Confederation working in over 90 countries for a world where all people live with dignity and security.

Delivering healthcare to over a billion people is a very complex challenge. CARE India works in close collaboration with State and Central Government and other partner organizations to secure accessible and quality maternal and child healthcare among marginalized communities. We work towards identifying the root causes of healthcare challenges, provide innovative solutions, and help implement secure and quality healthcare services in India. We promote essential newborn care and immunization, reduce malnutrition, prevent infant and maternal deaths and protect those affected by Tuberculosis (TB). CARE India works closely with its partners to achieve good healthcare for everyone.

CARE India works towards motivating and encouraging its staff to imbibe, internalize and demonstrate these defined core values of the organization.

RESPECT: Believing in and appreciating the dignity and potential of all human beings.

INTEGRITY: Maintaining social, ethical and organizational norms and adhering to the code of conduct.

COMMITMENT: Fulfilling organizational goals with full commitment towards our duties and responsibilities.

EXCELLENCE: Setting high performance standards and being accountable for and responsible towards our work.

Approach

CARE India has made a considerable shift in its programming approach over the years. From direct service provision to enabling poor and vulnerable groups, CARE India has evolved into a rights-based organization in order to address underlying causes of poverty. Our focus is explicitly on the well-being, social position and rights of women and girls from marginalized communities.
