ORGANIZATIONAL STRUCTURE
STRUCTURE OF THE PUBLIC HEALTH TEAM

PROJECTS UNDERTAKEN- I have worked in two projects till now. One was based on the ASHA incetivization process and the other was on Tuberculosis and patients' adherence to treatment of Tuberculosis. My major role was to conduct In-depth Interviews and Focus Group Discussions with District and State level officials and analyse the data that was obtained from these IDIs and FGDs and make a report. I was also involved in program management for some part of the study.
