

**Internship at
Sarvodaya Hospital and Research Center, Faridabad**

By

Shovika Negi

MBA Hospital and Health Management

Academic year, 2015-2017

The IIHMR University, Jaipur

1, Prabhu Dayal Marg, Sanganer Airport
Jaipur-302029, Rajasthan
Ph: 0141 3924700, Fax: 3924738
Website: www.iihmr.edu.in

Introduction

Internship is an integral part of MBA as it is a crucial time to convert two years knowledge into the skills. This helps us in the understanding of overall functioning of the hospitals from a managerial point of view. I tried to visit different hospital departments of **Sarvodaya Hospital** with a special focus on understanding the various procedures in place.

Hospital Vision

To position the group as a healthcare leader, providing all levels of quality based medical services with a focus on afford ability & medical excellence.

Hospital Mission

A three-tier system to provide ‘primary, secondary and tertiary medical care’. Our hospital’s philosophy – “Good health for all at an affordable cost, building a healthcare facility with the medical excellence and a committed, dedicated, and contended workforce”

The goal of Internship were:

- To learn the daily operational management of the Organization and its various departments / areas.
- To study the salient and critical features about the functioning of these departments / areas.
- To identify issues / problems associated with some specific departments / areas.

HOSPITAL PROFILE

Sarvodaya Hospital & Research Centre is amongst the finest medical institutions in Faridabad. Spread across 4.25 acres, the hospital houses state-of-the-art facilities including 300 Beds, 65 ICU Beds, 6 Operation Theatres, and a floor based Cath Lab. With its motto of 'Cure + Care' and dedicated team, Sarvodaya delivers super specialty services across a gamut of disciplines. As one of the best heart hospitals in the Delhi NCR region, Sarvodaya Hospital & Research Centre brings some of the best cardiac specialists (including one of India's most experienced cardiologists), the latest technologies and a philosophy of curing through caring to deliver next generation cardiac treatment to its patients.

Be it a simple chest pain, a basic heart check-up, advise on reducing heart risk, a second opinion, an advanced cardiac intervention like angioplasty and bi-ventricle pace maker implantation or any other complex surgical procedure, trust our expert heart specialists and cardiac surgeons to provide the most comprehensive and personalized care in not just Faridabad, but the entire NCR region

Sarvodaya offers end to end services from prevention to early detection and from comprehensive treatment to palliative care under one roof. The Centre of cancer hospital in Delhi NCR is supported by state-of-the-art equipment's in Centre's of Pathology, Radiology and Blood Bank to provide safe blood and blood components as per international standards and regulations.

SCOPE OF SERVICES

- GI Surgery
- Neurology
- Neuro- Surgery

Department visited:-

FRONT OFFICE

I) MAIN RECEPTION

GAPS:

- No security guard to guide the cars
- Wheelchairs are not allocated in OPD area
- No wall clock at Main Reception Area.
- Que management is difficult at times

PHC

(PREVENTIVE HEALTH CHECKUP)

Patient enters hospital

Registration done at PHC Reception and billing is also done there after packages has been explained to the patients

Sample collection done in PHC Sample Collection Room

Sample sent to Lab

FLOWCHART FOR ADMISSION OF A CASH/NON TPA PATIENT

Patient can come from

OPD

ICU

EMERGENCY

POST -OPERATIVE

WARD

Admission counter

- Ward coordinator changes the patient status in HIS by

Assistant gives a call

doing "**CHECK-IN**" of the patient received.

to ward coordinator to

- ICU/ EMERGENCY/ POST-OPERATIVE WARDS (from where

Confirm for bed

the patient is coming) changes the patient status in their

availability.

HIS by doing "**CHECK-OUT**" of the patient.

Entry done in HIS, Register, White Board by Nursing In-charge

Nurse informs the concerned Doctor

Doctor comes & prescribes medication and investigation (if any)

Nurse indent the prescribed drugs on HIS, Pharmacy accepts the indent and issue it,

Ward boy deliver the drugs from Pharmacy

Nurse starts medication + prepares the patient for investigation (if any).

Nursing staff collects
patient's sample +
Fills up Lab Requisition
Form + Enters into HIS

Sample bought by ward boy to Lab

IPD PHARMACY

Layout: -2 FLOOR

Status: In – sourced

Staff: 11

Hierarchy:

Infrastructure:

- Desktops: 4
- Printers: 3

- Refrigerator: 2

GAPS:

1. No analysis done for inventory management.
2. Stocking of drugs poorly done.
3. Space constraints.
4. Re-Order level is not defined
5. Layout not updated with HIS
6. Poor communication with purchase department.

Observational Analysis

Positive Features

- All the signage is in local language and placed appropriately.
- Eleven steps of hand washing protocol, Mission-Vision and department specific charts are put up at every Nurses Station, desks and supervisor rooms.
- Security guards are assigned at the entrance of every ward/area and elevators to maintain decorum.
- In-house ATM facility available.
- Special play area for children

Limitations

- Number of washrooms in OPD area is less compared to patient load.
- According to NABH guidelines, there should be a prayer room in the hospital, which is not present in Sarvodaya Hospital, Faridabad.
- IPDs and ICUs are supposed to be quiet, acknowledging the demand of the patients, but nursing staff creates lot of noise.
- There is no queue system in pharmacy.
- There is no waiting area for pharmacy. It's combined with the OPD waiting area.

- Space constraint in OPD and Cafeteria as well as less sitting arrangement.
- Delayed response of the staff to the bell alarm by patients in IPD.
- Despite of different coloured uniforms for clinical and non-clinical staff, there still is no distinction in the overalls of physicians and paramedical staff.
- Informed consent to be filled by patient or their family members before undergoing any procedure is not in local language and incompletely filled.
- Red and Yellow coloured bags are used in the IP-Pharmacy where only green coloured bags should be used. Red bags are used for high alert medication and the yellow bags are used for stat/now orders.
- Number of chairs is present is a big problem in IPDs.

Suggestions

1. Chairs in the waiting area can be better organized and more chairs can be added by utilizing space properly.
2. Only green coloured bags should be used in the pharmacy replenishing their stock well in time by setting an appropriate Re-Order Level.
3. Dress Code for all the staff should be properly worked out assigning different colours to different staff members to avoid confusion. Charts explaining the colour code can also be displayed at various places.
4. A floor monitor (Can be made someone from the supervisors' team) should be assigned specifically to maintain discipline among the staff members.
5. Proper queue system should be implemented in the OP-Pharmacy with a help of a security person or a token system.
6. Nurses should be briefed and strictly monitored to answer the in-patient's call within a span of five minutes.
7. More chairs and other furniture should be bought and adequately distributed.
8. Informed consent should be duly signed and completed there and then at the time of admission or procedure. Strict action should be taken against the assigned staff who fails to do so.
