INTRODUCTION

VISION: Aim of providing comprehensive medical resources under one roof, while maintaining the highest standards of excellence.

In the years since, the hospital has lived up to that dream, and has built a stellar reputation for complete care-giving. Today the hospital has an enviable list of Specialties and Multi-Specialties on offer. Each department has been painstakingly built over the years into a completely networked facility, designed for maximum convenience to the patient. It has over ten medical and surgical disciplines. Its services are supported by sophisticated technology and experienced medical professionals. The hospital is well supported by friendly staff and most of our patients are extremely satisfied with the service they get. Our hospital consists of 24x7 ambulance and pharmacy services to our patients. The mission is to adopt world-class technologies and processes that earns the trust and confidence of the patients. To be vital ray of hope in their lives with healthcare solutions that are superior, personalized and care oriented. The values and vision is to be the Centre of excellence for the most efficient & competent providers of comprehensive healthcare in India.

GOALS OF INTERNSHIP

Practical exposure is an integral part of Masters of Business Administration in Hospital Management (MBAHM) Programme. As part of the curriculum, students of the final year are required to undergo internship training at reputed hospital for a period of three months.

The overall objective of the internship to provide practical exposure to the students about the day to day management related problems in an organisation. Through this exposure the students are expected to gain practical knowledge and skills to handle managerial issues related to major departments of a hospital.

The student is expected to identify a specific problem area or a department for dissertation. This activity is envisaged as a problem solving exercise by which then student is expected to:

1. Diagnose critical problem within an operational area.
2. Provide the management with a set of alternative solutions and
3. If possible design a implementation plan to carry out the most feasible solution.

SUPPORT SERVICES

Nursing care

The nursing team is committed in providing the patient with professional and compassionate nursing care of highest standards. The staff nurses are responsible for daily care during patient's entire stay at hospital. Every single room's bed is equipped with the call button directly to the nursing station.

Housekeeping

To ensure the patient's room is kept neat and tidy during stay, the housekeeping personnel clean the room twice a day, if patient wants any additional cleaning in the room, the patient can contact housekeeping supervisor. Ward lady will provides clean bed linen every day, hot water is supplied in all bathrooms and waste bins are provided with each bed.

Dietary Service

During the stay in hospital, the patient may be placed on a special diet by the doctor. After the initial investigations, the dietician visits the patient & in consultation with the doctor, looks in to patient's nutritional needs. After going through the medical history, dietician plans a diet chart, ensuring that all the meals are nutritionally balanced.
