About us

Global Data is the premier source of actionable insight into the energy and healthcare industries. With the combined expertise of more than 1,000 researchers, market analysts and consultants, we provide high-quality, accurate and transparent industry insight that helps our clients to achieve growth and increase business value.

Combining precision with innovation, our research and consulting solutions ensure our clients stay at the forefront of their markets by integrating accurate market forecasts and analysis on the latest trends and developments with the unrivalled expertise of our analyst teams. Among other benefits, our informed industry perspectives help clients understand how to generate the maximum return from their key markets, identify opportunities from emerging trends, and devise strategies for growth with confidence.

Our Values

Our Promise

We are committed to delivering value to our clients through actionable insight, innovation and expertise.

Our Values

Our clients trust us to provide insight that will help them achieve demonstrable results and business growth, so quality, integrity and accountability underpin everything we do.

As a result, our clients can be confident that the intelligence contained within any of our research and consulting solutions will help them make sound business decisions that will have a positive impact on their operations.

Throughout our solutions portfolio, clients will find the following core principles:

- High-quality data, analysis and insight
- Accuracy and precision
- Complete transparency of methodology

Sectors We Cover

With our research and consulting services, clients gain the knowledge needed to navigate the shifting commercial arena and stay ahead of their competitors.

Energy

GlobalData delivers actionable insight into the energy markets for some of the world's leading corporations. Backed by a team of experienced market specialists, we combine leading research and expert analysis with an unparalleled understanding of the industry to provide invaluable perspective that accelerates growth and expansion into new markets.

Find out more about our research and consulting solutions for oil & gas, power and petrochemical sectors.

Healthcare

Global Data's leading research and consulting solutions have assisted businesses based across the pharmaceuticals, biotechnology and medical equipment markets in making strategic decisions that have increased the value of their products and services. With experienced healthcare analyst teams based in key locations worldwide, our experts provide the actionable insight needed to improve decision-making across the value chain, including opportunity assessment, market entry strategies, and competitive benchmarking.

- High-quality data, analysis and insight
- Accuracy and precision
- Complete transparency of methodology

Testimonials

Our quality, integrity and commitment to delivering value for our clients means that our research and consulting solutions are relied upon by the world's leading corporations to achieve growth, maintain their competitiveness and stay at the very forefront of their markets.

It's refreshing to have one source for all my research requirements.

Senior Knowledge Officer, Top 5 Advisory Firm

The in-depth knowledge demonstrated by your analysts was very impressive — I doubt we would have found expertise like it anywhere else.

Director of Business Information

Everyone here is very enthusiastic about the Global Data databases. I've used them for some projects and have found the marketing data to be very helpful. The level of overall detail provided is really impressive!

Emory University

Credentials

Our growing reputation as a provider of leading industry research and consulting has attracted the business of some of the leading corporations in the world, who we have helped with expanding services in emerging markets, launching products overseas and assessing the activities of key competitors.

Highly experienced healthcare and energy analysts

Based in 18 locations worldwide, we have the best critical thinkers on our teams working to ensure we provide our clients with competitive analysis, coupled with a supportive service.

- Over 60% of our analysts hold a Master's degree
 - A high proportion are also qualified to PhD level
- In addition, our senior analysts have at least seven years of experience within their specialist fields, and have worked for world leading companies across the Energy and Healthcare industries.

VALUABLE RESEARCH SOLUTIONS

Our research combines the industry experience of our professional analyst teams with the perspectives of respected thought leaders and KOLs, resulting in valuable research solutions that integrate watertight data with actionable insight.

With a background in helping some of the world's leading businesses succeed, combined with our teams' industry expertise and superior market intelligence capabilities, our clients can be sure Global Data will provide them with the most valuable business intelligence solutions available in the market.

LEARNING FROM ORGANIZATIONS:

During my solitude in this organization I have learnt a lot of things not even made me technically strong but mentally also but from the aspects of my role in organization I have added up following skills as my learning :

- Market Research
- Data Analysis
- Primary and Secondary collections
- Forecasting
- Market estimations
- Market Modeling
- Company Share Analysis
- Report Writing
- Client Handling
- Business and Professional Communication
- Professional and Organizational Behavior
