

Brief History- Jiwi Daah Hasa “Means” (Life – Water – Soil): -

When the rainwater flows from the rich to valley directly into the river, and the water carries the soil along with it. Due to which the water level goes down. Through Jiwi Daah Hasa, we can save water and soil by conserving soil water and building related structures, which maintains moisture in the fields and can be cultivated better.

Strength

- Watershed Development
- Mobilizing
- Improving the ability of land to hold water
- Rainwater Harvesting and Recharging water

Weakness

- Poor Management
- Organization's CRP needs proper training

Opportunity

- Livelihood generation
- Project Implement
- People employment

Threat

- Climate change
- Conflict between Management and people
- Lower Participation.

- **Suggestion:** -Dual crops are being grown, but still there are many people who are unaware of the usefulness of watershed programs. So, there is a need to bring awareness to them. Since it is successful it needs to be implemented in more villages.

- Strive to continuously enhance the livelihood of the villagers
- Monitoring of all schemes should be done from time to time.

Learning and Value addition :

- Understand the Water harvesting and project (Jiwi Daah Hasa)
- We got information about how the people of the village live and what is their culture.
- Received information about MNREGA work at grass root level
- Working at the grass root level
- Learn about Model Agro Agriculture Fish Farming and shemina Agro horticulture and Received information on how ShG Group works

Vision – To make the life of the rural community resilient and sustainable, to improve the business of the farmers, as well as to enjoy the life of the villagers to a fuller quality within the ecosystem.

Mission – WOTR aims to end major causes of rural poverty by rejuvenating ecosystems and building community resilience to climate change.

Usefulness of Internship

- I have experienced about Organization
- Gain confidence
- Practical exposure and Network with Professionals in the filed it is helpful for me to move forward in the future .

Key challenges:-

- There was a need to unite the people of the village to hold a meeting.
- Communication and interaction
- Local kurukh language.

Practical and theoretical difference

Theoretical -

- Jiwi-dah-hassa project
- Detail Project Report (DPR)
- Gram Sabha Approval

Practical –

- Gram Sabha
- E-PRA
- Shg participation

Organization Structure

Name- KULDEEP MUNDA
 Roll no IIHMR-U/ 0030 2022-24
 Organization Mentor Mrintunjay kumar mahto
 Faculty Mentor Name- Dr. Goutam sadhu
 Branch : MBA Development Management Jaipur
 Title of the poster – Watershed work plans are going on
