LEARNING AND VALUE ADDITION

- ❖ Organisational ethics
- ❖ Exposure to country-wide SWACHH BHARAT MISSION, nation developing project.
- ❖ Quality check of Data, data collection.
- ❖ Team work
- ❖ Handling work pressure

India-States

Error Reporting in Plants

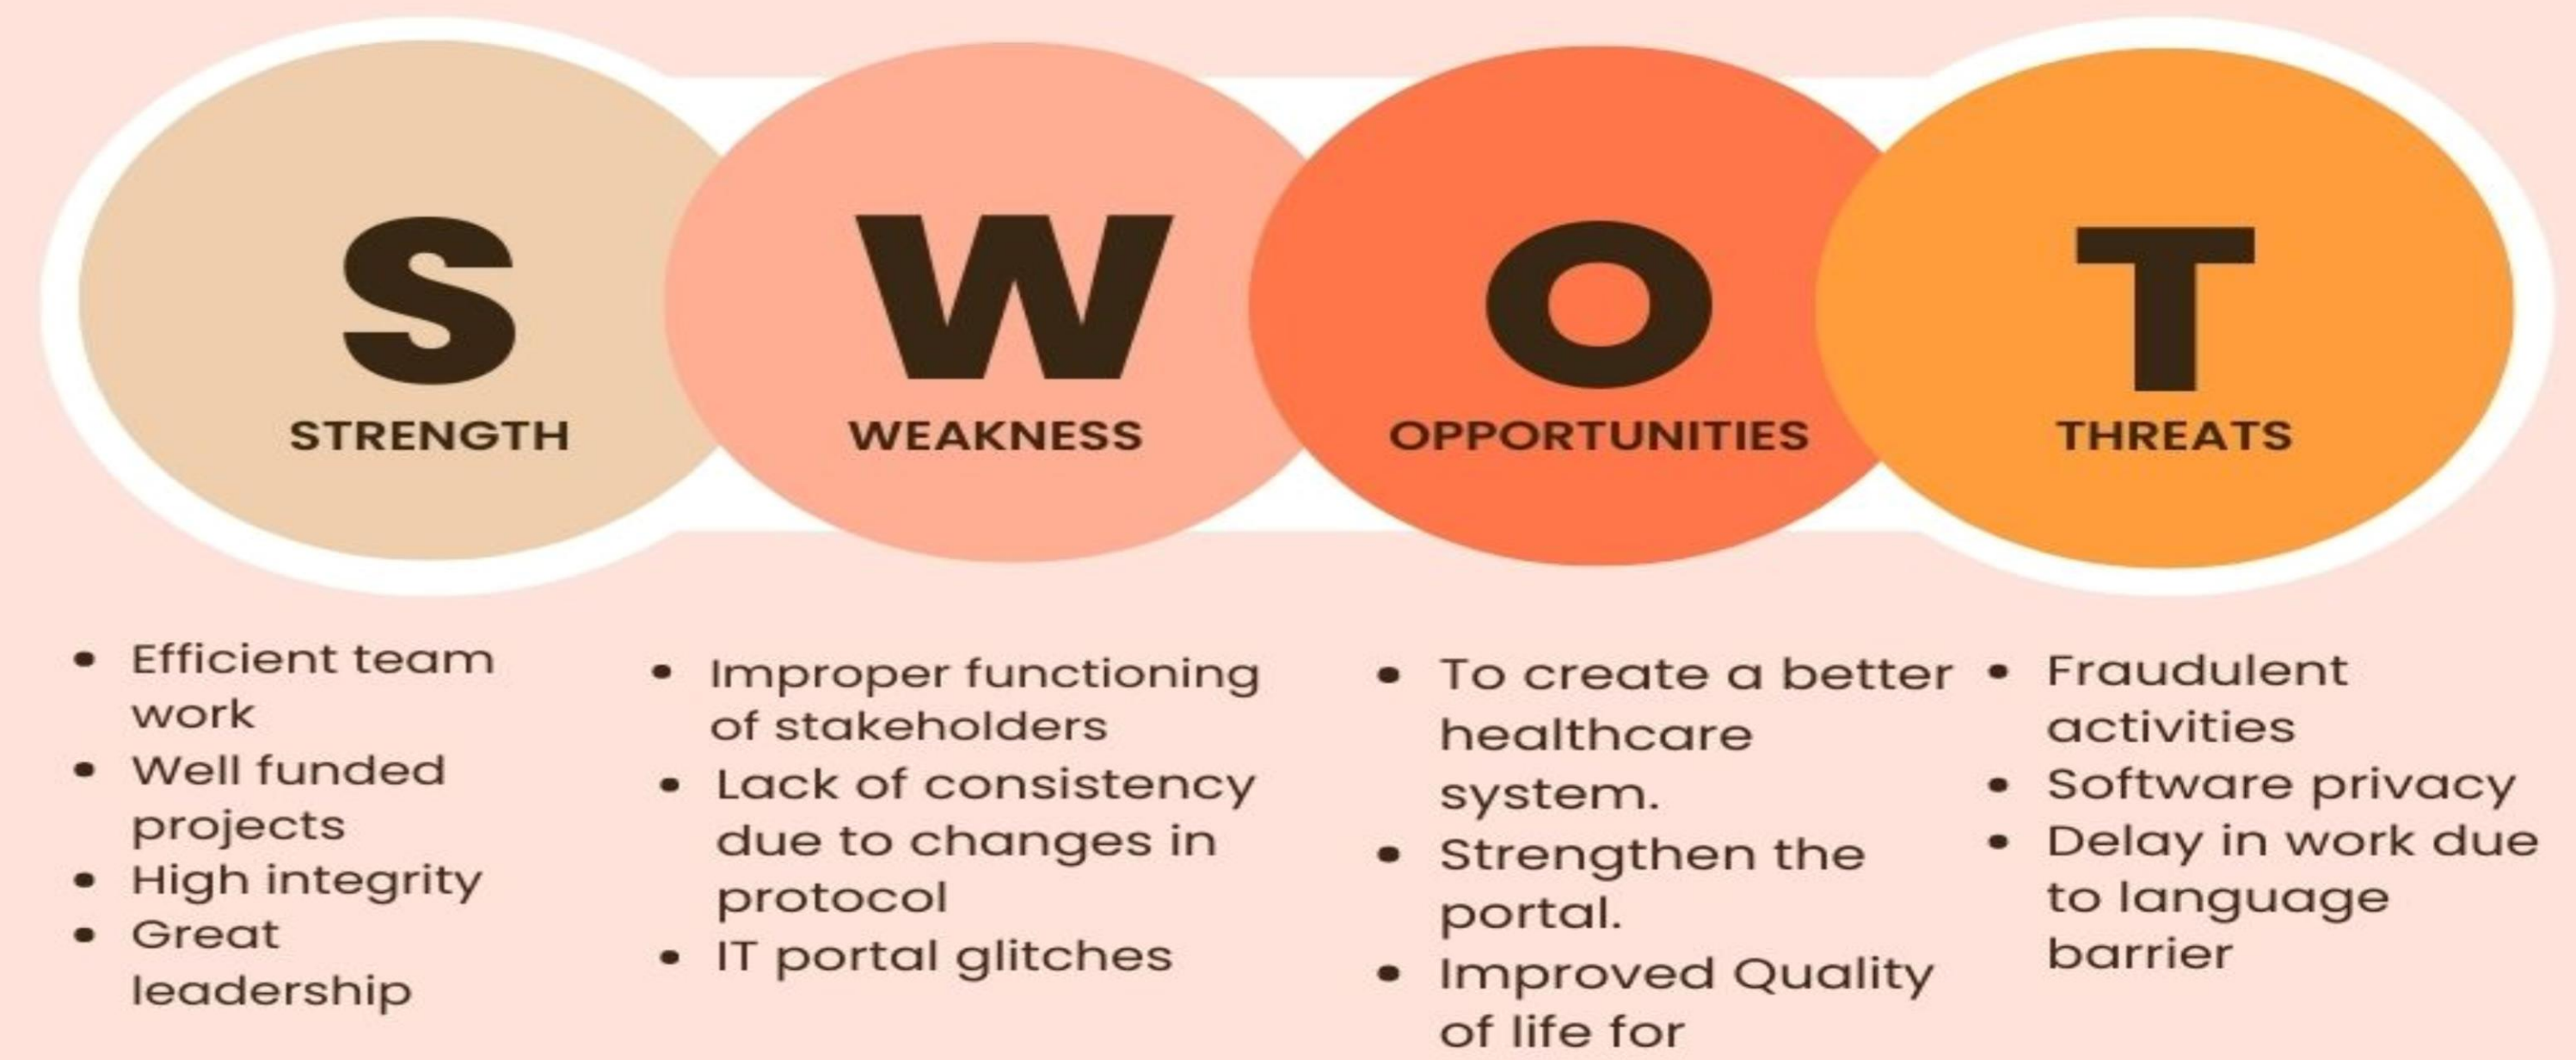

GAP ANALYSIS

The direct observation done extract out the functionality of the plants in the country. I was assigned ULBs out of which the maximum error was reported in the dysfunctionality of construction and demolition plant and minimum error was reported by the bulk waste generators, this analysis shows the gap in the ULBs which they need to work on to achieve garbage free city rating.

INTRODUCTION

- ❖ IQVIA is the technical consultant for Swachh Bharat mission (Urban) under the Ministry of Housing and Urban Affairs for conducting on-ground assessment of Star Rating for Garbage Free Cities and Open Defecation Free Protocols. The engagement requires in-depth evaluation of cities on the approach and methodologies adopted for managing municipal solid waste. Uses big data and predictive analysis to improve human health.
- ❖ In India, IQVIA has over 17+ years of experience of conducting large scale nationwide census & surveys.
- ❖ Sector and an internal structure to support and enhance their services to Governments and multilateral funding agencies

SUGGESTIONS

- ❖ Development of error reporting mechanism.
- ❖ Improvisation of portal for effective work.
- ❖ Proper surveillance on assessors to avoid malpractices.
- ❖ Development of well functioned communication channel

PRACTICAL EXPOSURE VS THEORETICAL EXPOSURE

- ❖ Gained exposure of corporate functionality.
- ❖ Application of theoretically learned modules in the project including organisational behaviour, research methodology

Challenges

- ❖ Delivering immediate results
- ❖ Providing more value at same cost
- ❖ Workload management

Usefulness

- ❖ Analysing information
- ❖ Problem-solving
- ❖ Clearly communicating
- ❖ Public speaking
- ❖ Exposure to the urban health project

Process
