Mission

BUILDING A BETTER WORKING WORLD. IT IS DETERMINED TO DO EVERYTHING TO LEAVE NOTABLE IMPACTS WHEREVER IT OPERATES.

Vision

BUILDING THE WORKPLACE OF THE FUTURE AT EY A PLACE THAT'S SMARTER, MORE INCLUSIVE, MORE DYNAMIC AND MORE FLEXIBLE.

Introduction about EY

Ernst & Young (EY) is one of the leading accounting and consulting firm globally. Since 1989, EY has shown its commitment to the focus its mission and vision by prioritizing growing together with the people it serves. EY also draws significant influence from its core values. With a rich history dating back to 1849, EY has grown to become one of the "Big Four" accounting firms, along with Deloitte, PricewaterhouseCoopers (PwC), and KPMG. The firm operates in over 150 countries, employing a vast network of professionals dedicated to delivering high-quality solutions to their clients.

Difference between Practical exposure and theoretical understanding

Practical learning involves hands-on experiences, where interns actively engage in real-world tasks and projects related to their field of study or profession. This type of learning provides valuable opportunities to apply theoretical knowledge in practical scenarios and gain first-hand experience. Theoretical learning, on the other hand, is focused on understanding the underlying principles, concepts, and theories that form the foundation of a particular field of study.

Usefulness of Internship

Internship provided an excellent platform to bridge the gap between academic knowledge and practical research application. It can empowered the learnings by providing valuable skills, knowledge, and experiences that can contribute to the professional growth in future.

SWOT Analysis

STRENGTHS	WEAKNESS
EY has a vast global network with offices in numerous countries. This extensive network allows the healthcare consultancy division to access a diverse range of resources, expertise, and market insights, enabling them to provide comprehensive solutions to clients operating in different regions.	Being a large organization, EY's size and complexity can sometimes lead to challenges in terms of agility and responsiveness. In the fast-paced healthcare industry, where trends and needs can change rapidly, the ability to quickly adapt and deliver timely solutions is crucial.
OPPORTUNITIES	THREATS
The healthcare industry is undergoing significant digital transformation, and there are ample opportunities for EY's healthcare consultancy division to help organizations navigate this transition. This includes advising on the adoption of data analytics, cybersecurity, and telemedicine solutions.	Non-traditional players, such as technology companies and startups, are increasingly entering the healthcare sector and disrupting traditional models. EY must stay vigilant and adapt to these changes to avoid being overshadowed by emerging competitors.

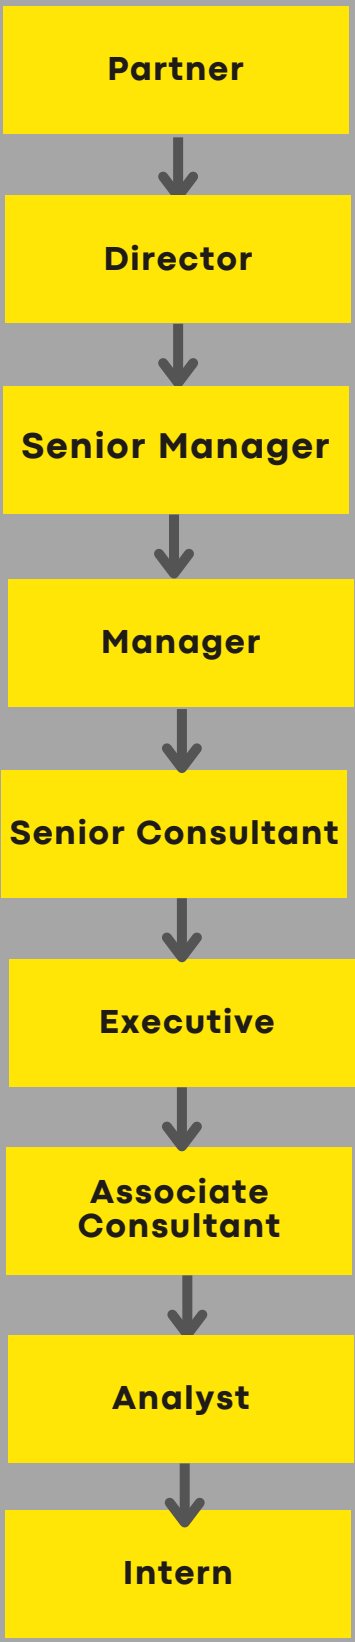

Learnings during Internship

- Gained proficiency in interpreting research data and presenting it in a clear and visually appealing manner.
- Learned how to gather relevant data from diverse sources, such as academic journals, databases, reports, and online repositories.
- Developed time management skills like managing multiple research tasks, meeting deadlines, and organizing the work effectively.
- Enhanced communication skills through interactions, discussions, and presenting the research to colleagues and supervisors.

Challenges faced during Internship

It took time to develop networking skills and build connections with colleagues and professionals in the different departments of the organisation.

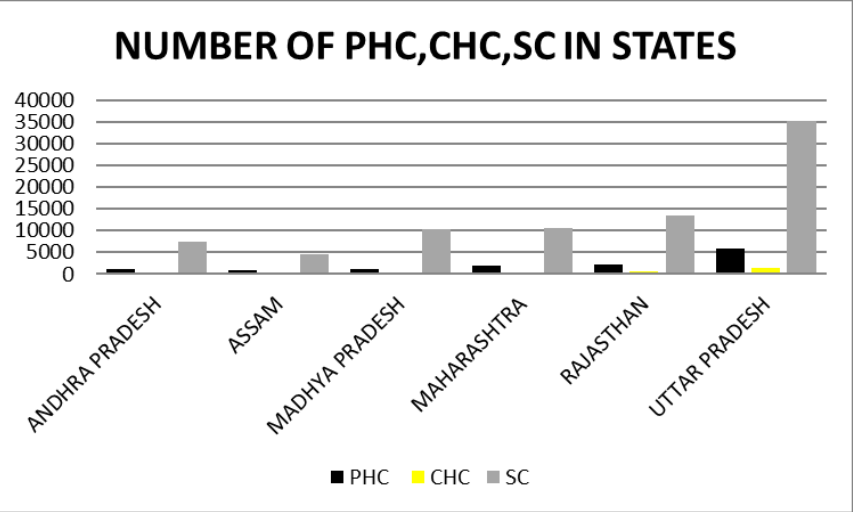

Organisation Structure

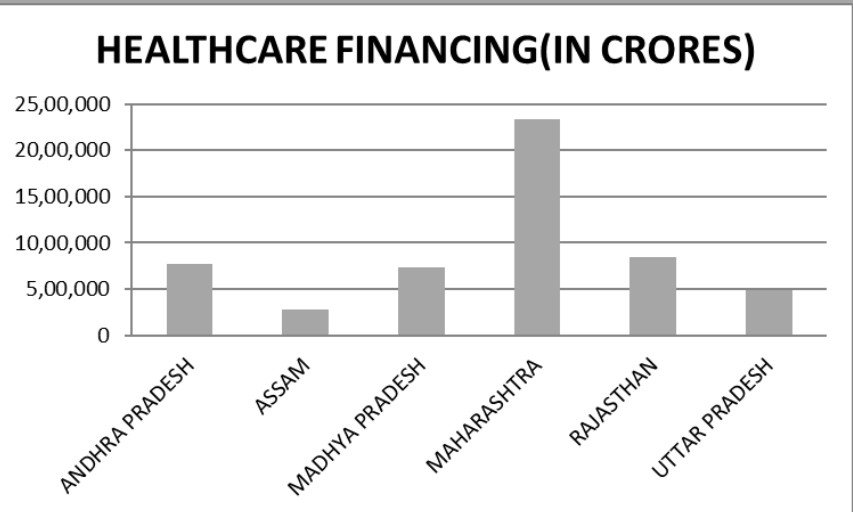

Suggestions

- Embrace digital transformation, such as electronic health records, telemedicine platforms, and health analytics tools. EY can assist clients in improving patient care, operational efficiency, and cost management.
- Enhance patient engagement and experience which involves implementing patient portals, remote monitoring solutions, and personalized care plans to enhance patient satisfaction and outcomes.
- Focus on health system optimization which involves conducting operational assessments, optimizing revenue cycle management, improving supply chain efficiency.

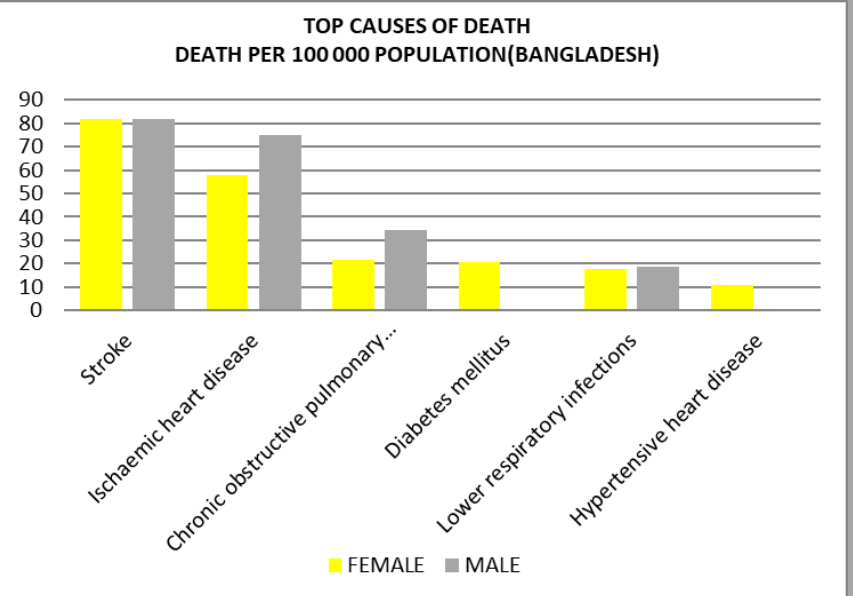

Graphical representation

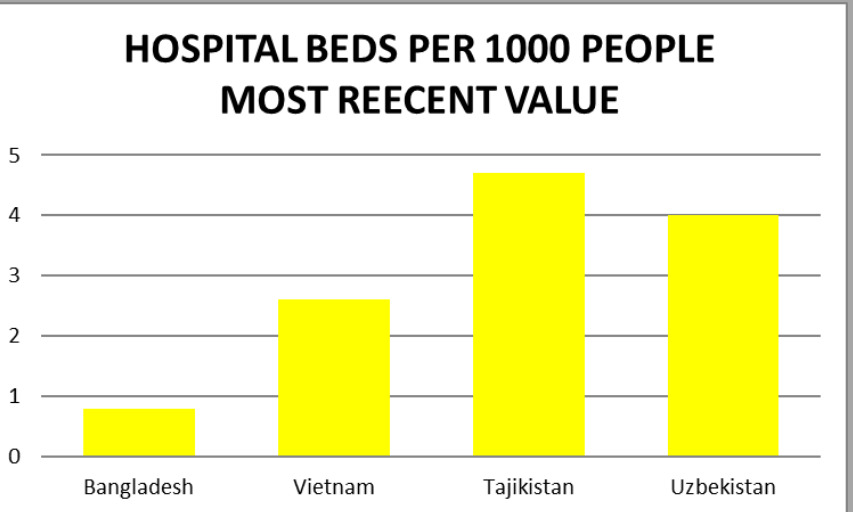

It is clear from the graphical representation that the number of PHC, CHC, SC are highest in the Uttar Pradesh state, having 1461 CHC, 5846 PHC, and 35115 SC.

It is clear from the graphical representation that the healthcare financing in crores is highest in Maharashtra, accounting for 2332992 Crs.

It is clear from the graphical representation that the in Bangladesh the top cause of death is stroke and can be understood that per 1 lakh population, about 82 males and 82 females face death.

It is clear from the graphical representation that in Tajikistan about 4.7 beds are present per 1000 people
