

About :-

Apex Hospital Started with 50 Bed Hospital, later on introduces with 200 Bed and Multi- Super Specialty Chain of Hospitals. Apex Health Group is one of the fastest growing multi-super specialty chain of hospitals in Rajasthan located in Malviya Nagar, Mansarovar, Jaipur, Sawai Madhopur, Jhunjhunu & Bikaner. Founded by eminent physician, Dr. S. B. Jhawar in the year of 1994.

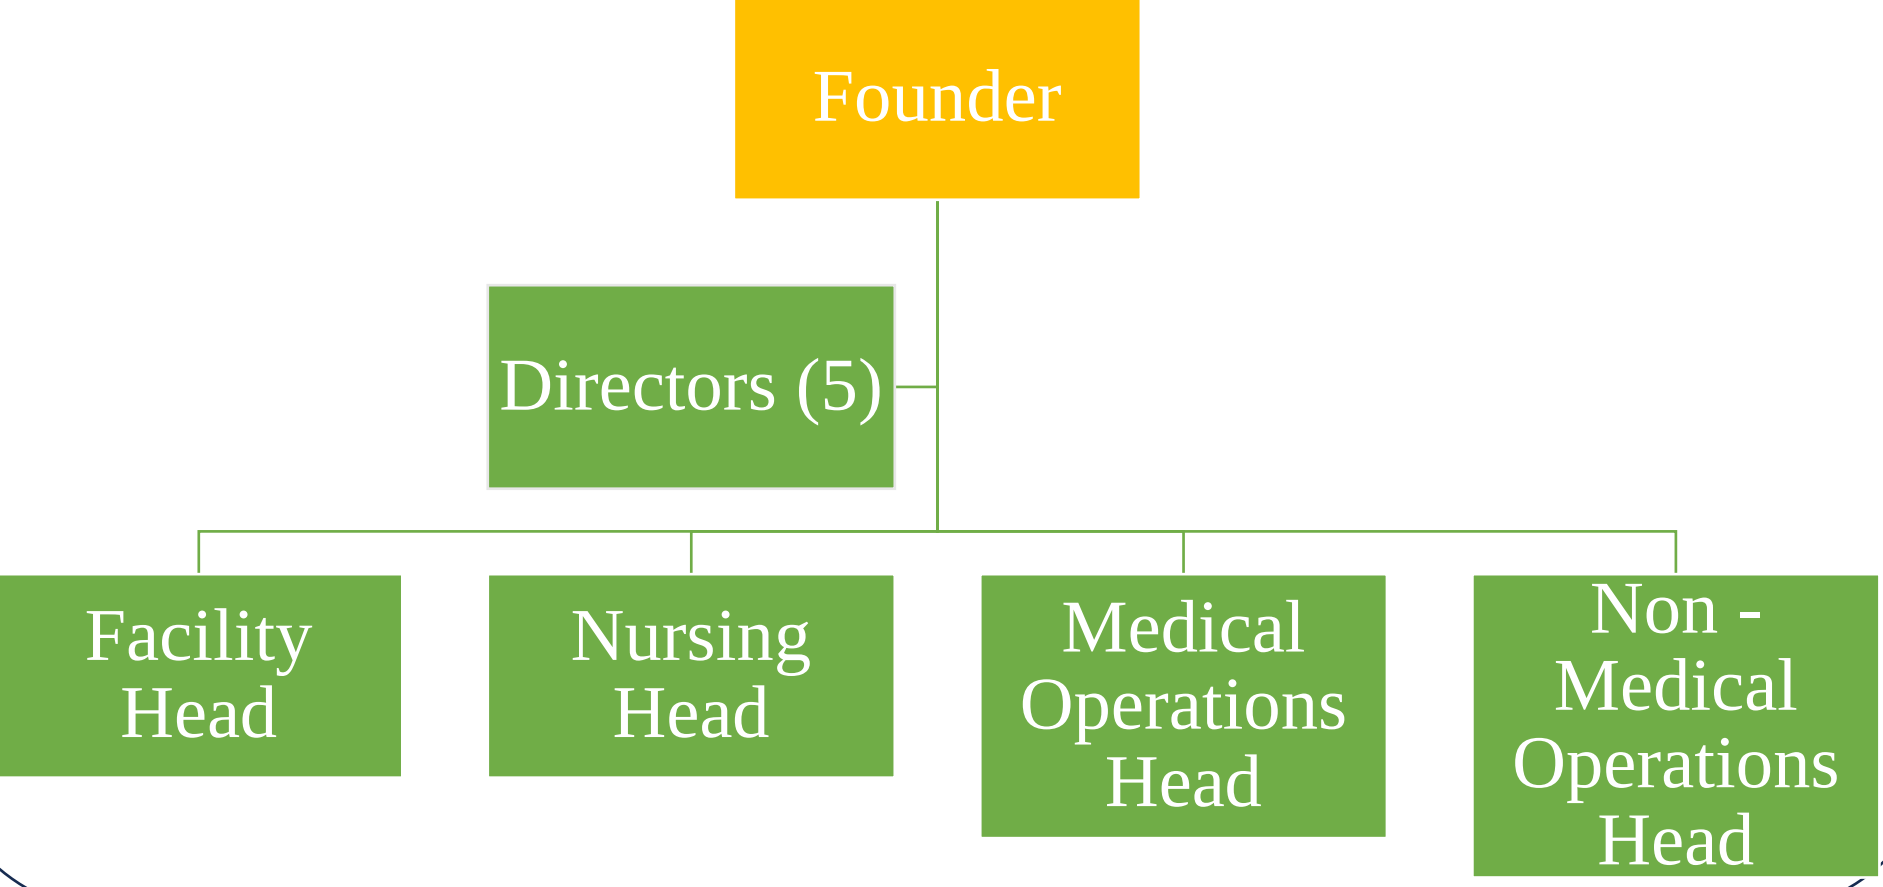

Our Vision :-

To deliver quality conscious and technology driven contemporary healthcare across segments, in an environment that is oriented towards patients and staff needs with all endeavors to ensure continuous education and training for a multi faceted personal and linear organizational growth.

Our Mission :-

To provide holistic quality care at a minimal cost in a hygienic environment with perseverance, dedication and compassion.

ORGANOGRAM :-

What is EICU ?

- EICU stands for Electronic Intensive Care Unit. It is a technological system that integrates advanced monitoring devices, data analysis tools, and telecommunication technologies to remotely monitor and manage critically ill patients in real-time.
- It allows healthcare professionals to continuously track vital signs, provide timely interventions, and make informed decisions, enhancing patient care and outcomes.

What is CCH?

CRITICAL CARE HOPE uses technology to provide critical medical services, specialist personnel & essential healthcare expertise to the most remote locations across India.

EXPERT INTENSIVISTS
EXPERIENCED INTENSIVE CARE SPECIALISTS MAKING SPECIALIZED ICU CARE AVAILABLE TO EVERYONE.

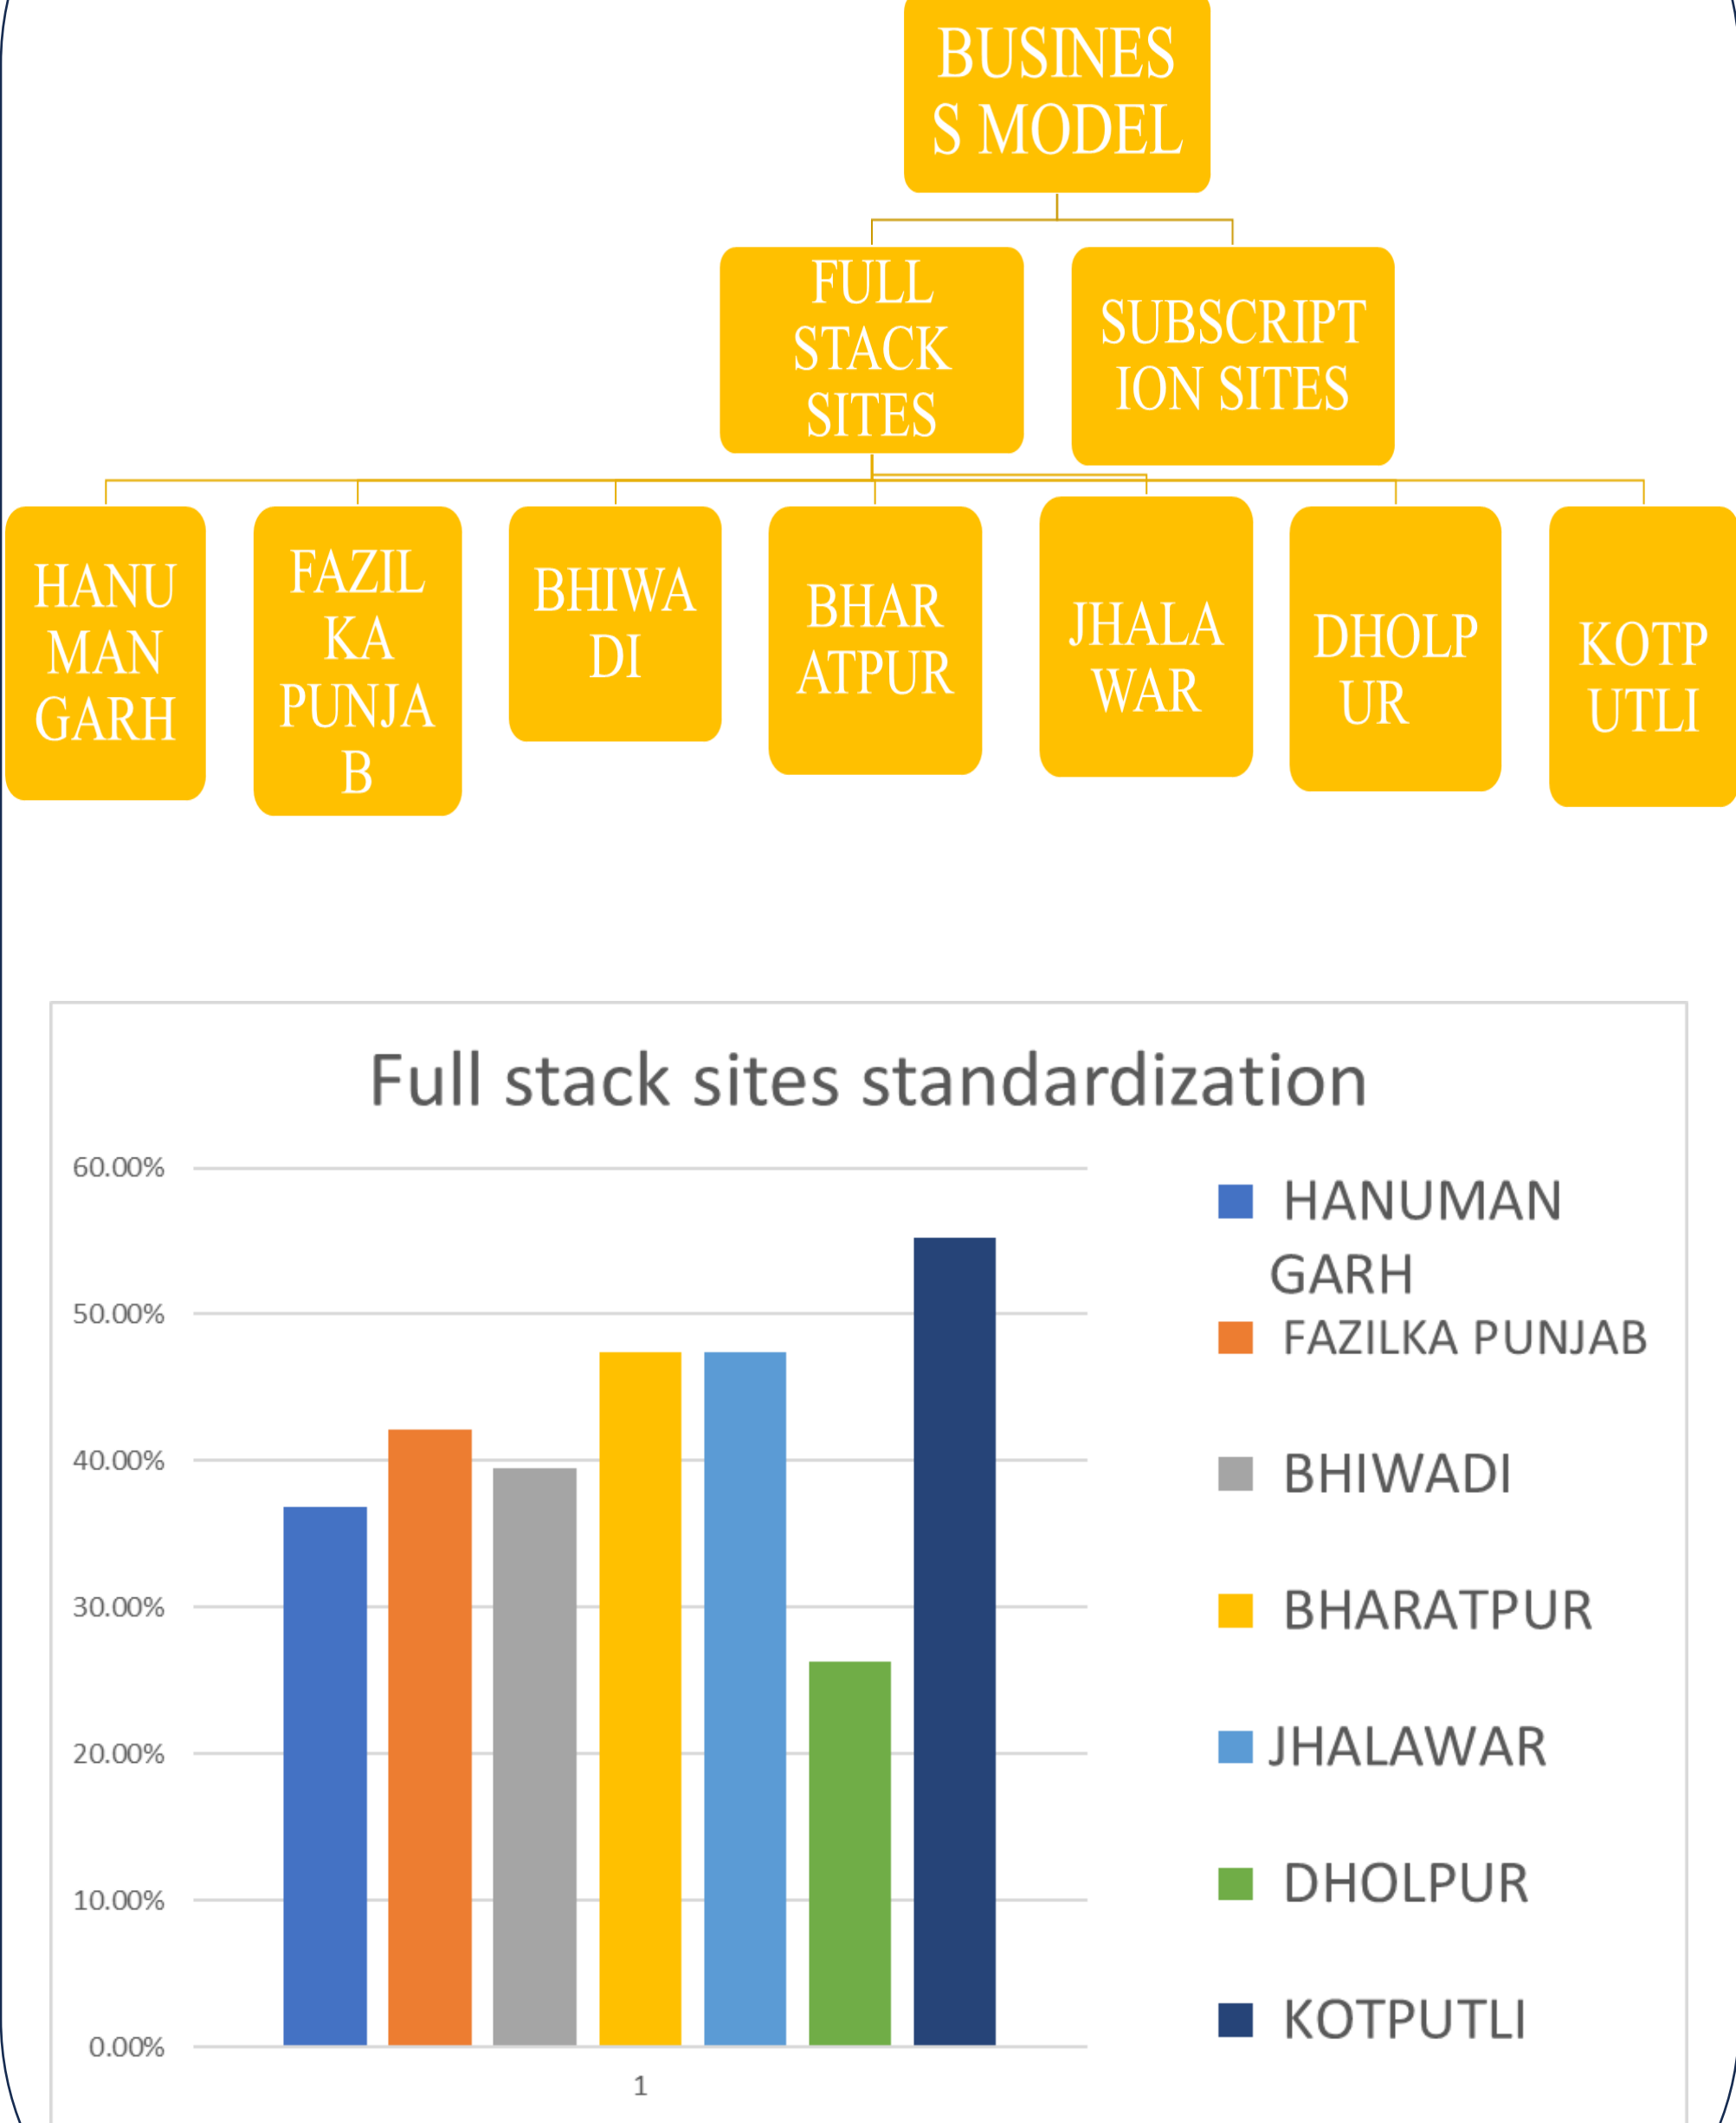

REMOTE CRITICAL CARE
USING THE 'HUB & SPOKE' MODEL TO DELIVER HEALTHCARE SERVICES THAT MAXIMIZE COVERAGE WITH MINIMAL RESOURCES

24/7 COVERAGE
24/7 HEALTHCARE COVERAGE THROUGH TELE-ICUS WITH EASY SET-UP & COST-EFFECTIVE APPLICATIONS

CCH NETWORK

Theoretical V/s Practical exposure

Theoretical exposure is more over a general idea about the hospital functions and department’s location whereas in the practical exposure I learned that the department’s location is more over based upon patient movement as the movement should be less between the departments. It also gave me an overall practical idea about job description.

Usefulness of Internship :-

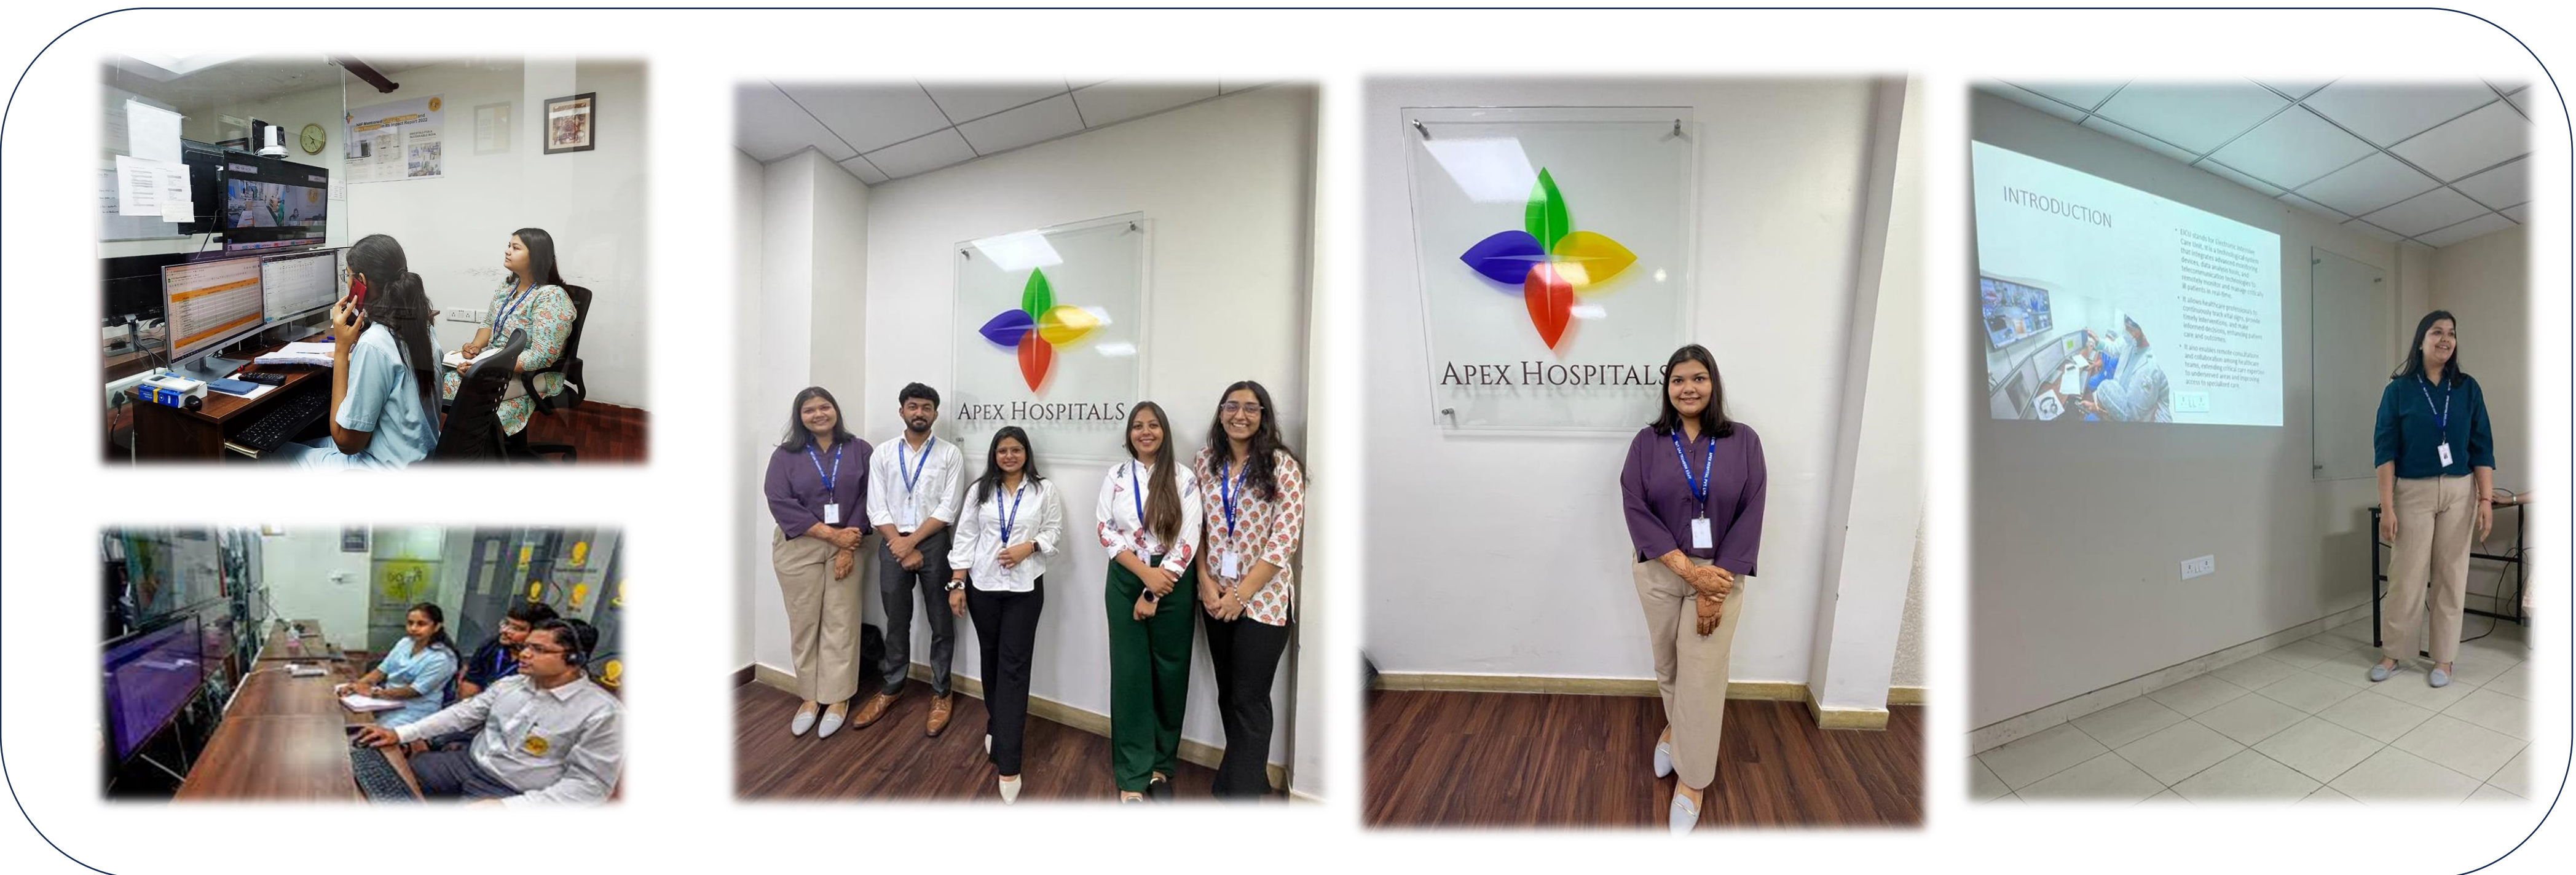

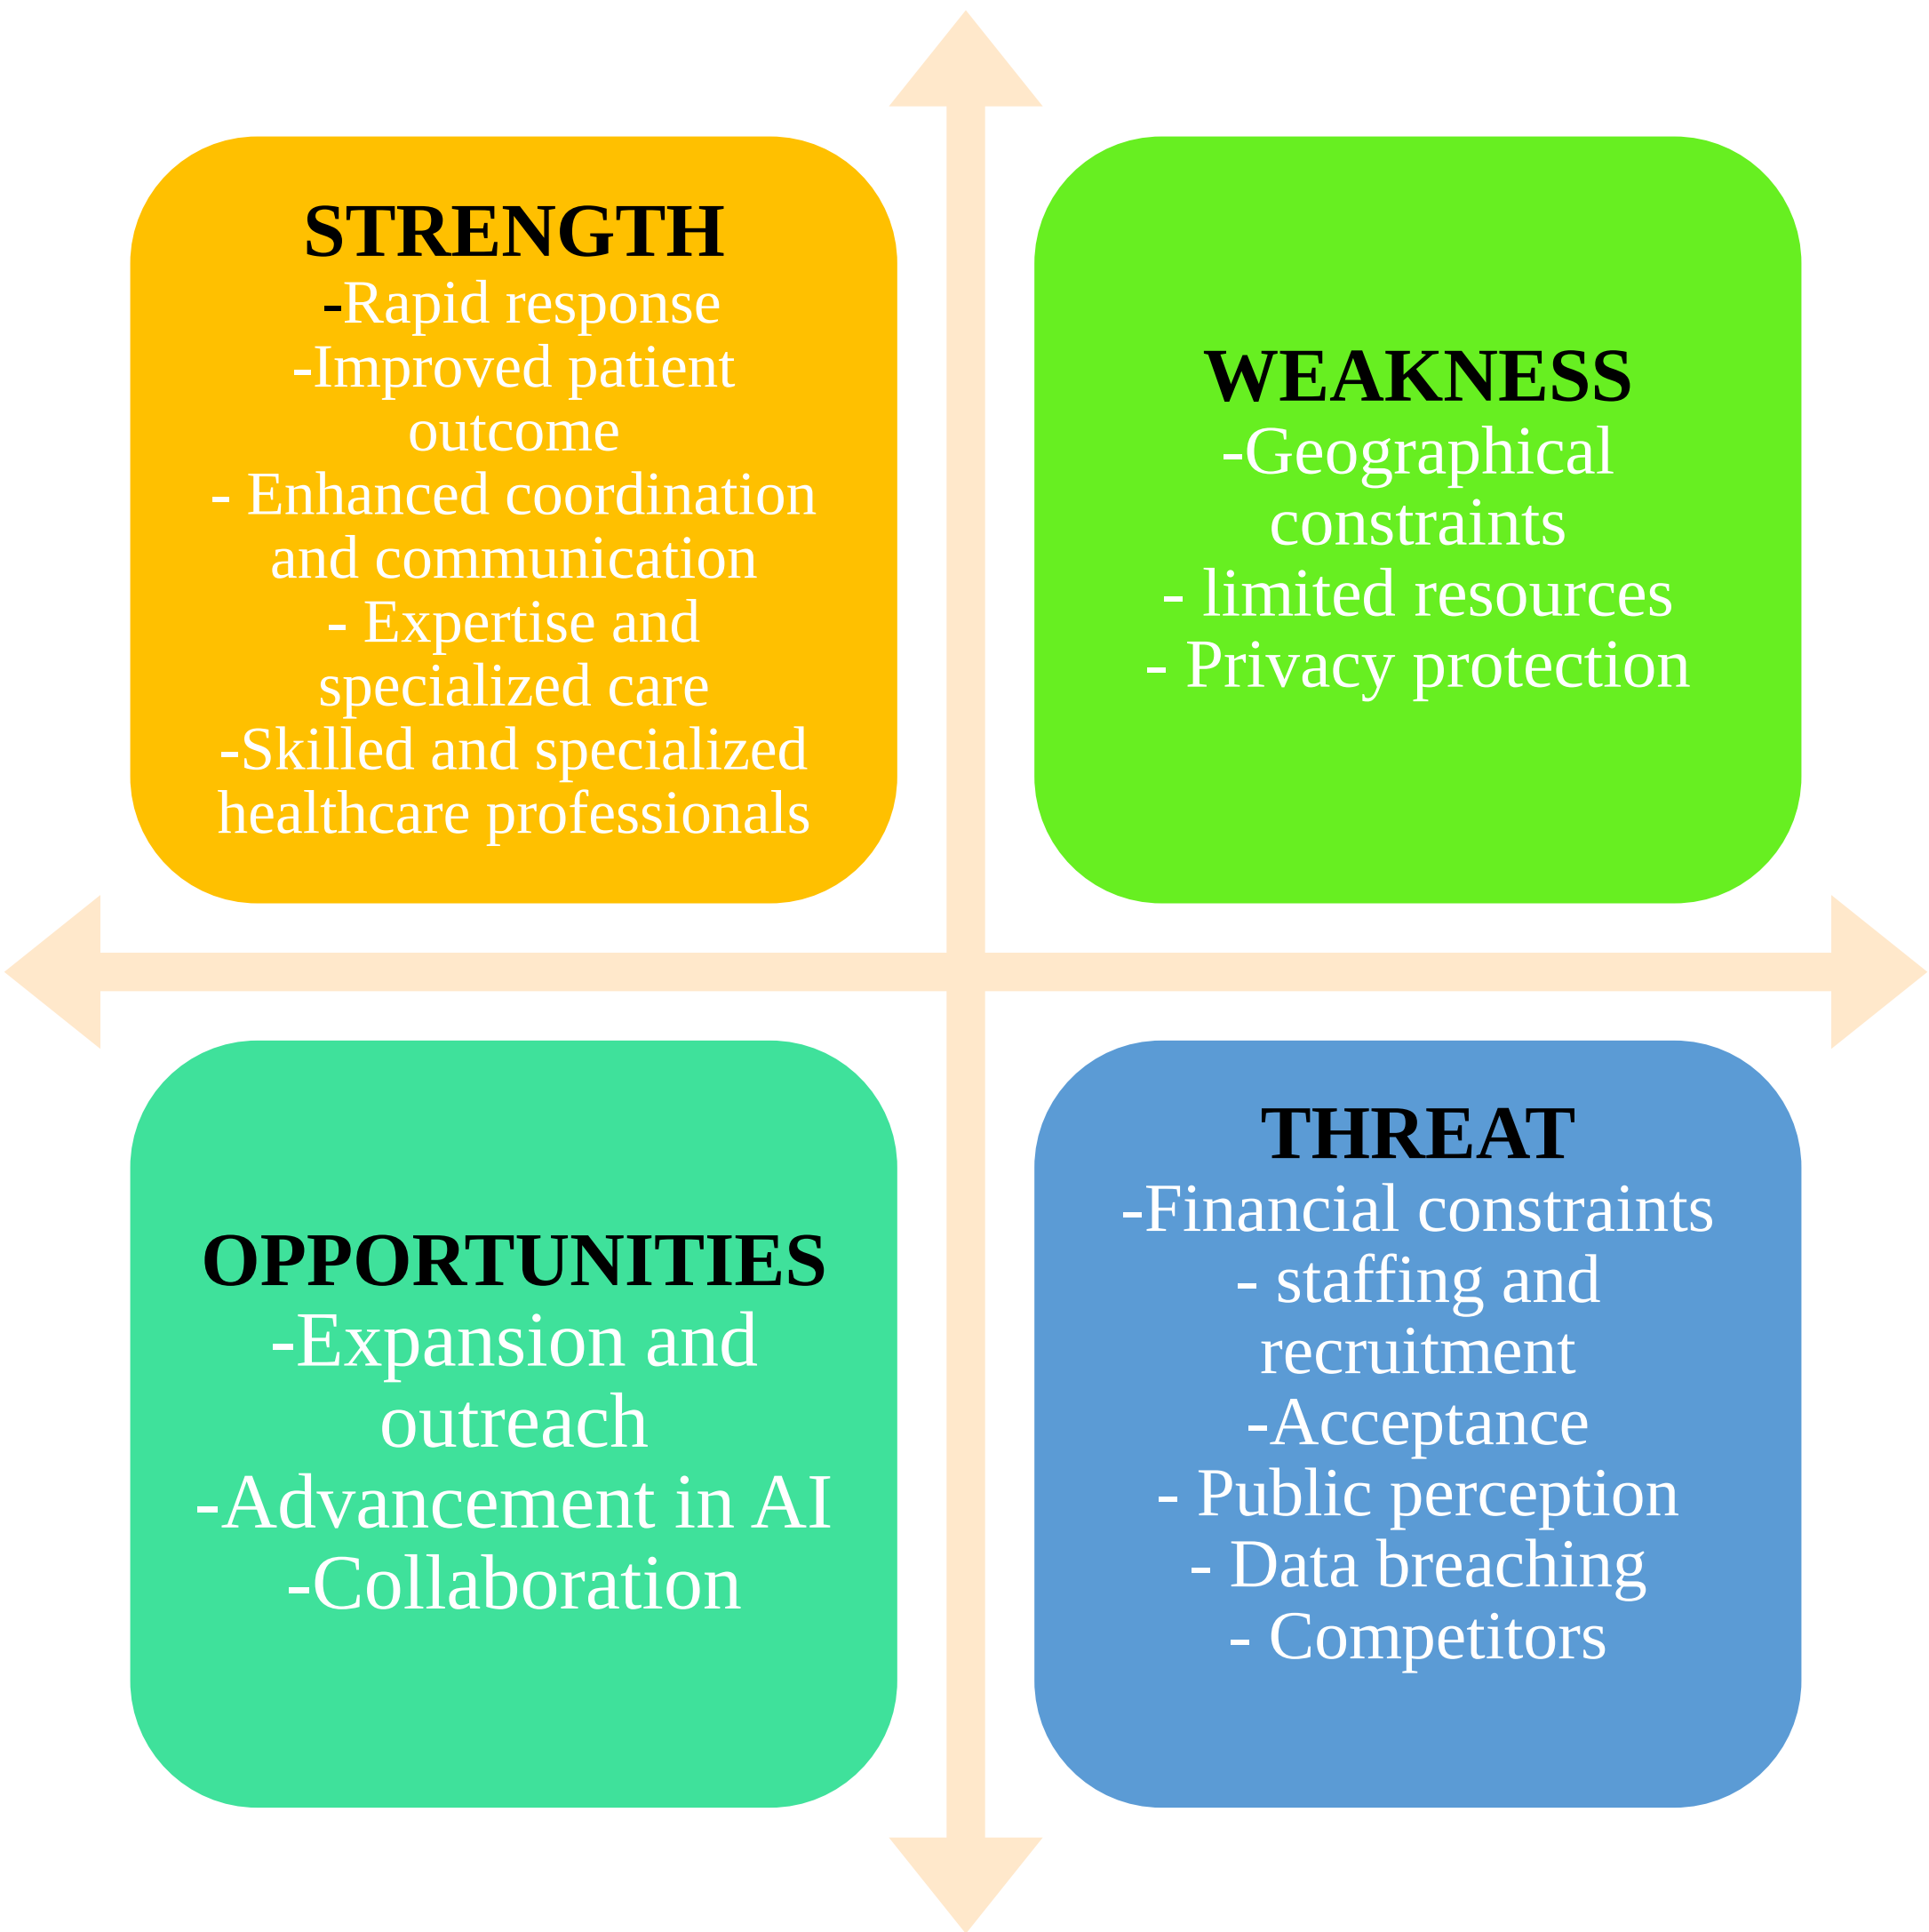

- Practical exposure about hospital and hospital management systems.
- Enhanced Learning
- Building Professional Network.

Suggestions :-

- Advanced monitoring technology-
 - Real- time monitoring
 - Smart alarms
 - Integrated EMR systems
- Regular multidisciplinary meetings.
- Involve patient and their families in the care process.
- Collect feedback from patients and their families as well as from staff also.

Challenges faced during internship :-

- The summer internship, for the most part went by without any hindrance but the only challenge I faced was irregular meet ups with the mentor.
- Also not knowing what to do next was challenge I faced a lot of times.
