COMPETITOR'S ANALYSIS FOR SAHYADRI SUPERSPECIALTY HOSPITAL

INTRODUCTION

Competitive analysis in marketing and strategic management is an assessment of the strengths and weaknesses of current and potential competitor. This analysis provides both an offensive and defensive strategic context to identify opportunity and threats.

Competitive analysis can reveal broad trends in the marketplace, again providing the advantage of being able to spot opportunities for differentiating your products and services. Sometimes going against the grain in an industry can attract a small but highly loyal counter-culture market segment.

This Report is all about competitor Analysis of Sahyadri Superspecialty Hospital, through this Analysis we will understand opportunity and threats for the same. For this analysis we have collected the primary data based on various variables. For this study we covered different Multispeciality Hospital and some Nursing Homes based out of two region that are “Kothrud” and “Deccan”, Pune.

Sahyadri superspecialty Hospitals is the largest chain of hospitals in Maharashtra. It is the brainchild of Dr. Charudutt Apte, it is one of India's most renowned Neurosurgeons hospital.

OBJECTIVES

- To know the what facility Sahyadri Super specialty hospital provide.
- To understand which are top competitors of Sahyadri Super specialty Hospital,
- To understand what are the Strength, weakness, opportunity, threats of Sahyadri superspecialty hospital.
- To understand how to execute CME and Campaigns

Following are the best multispecialty Hospitals in deccan and Kothrud Region.

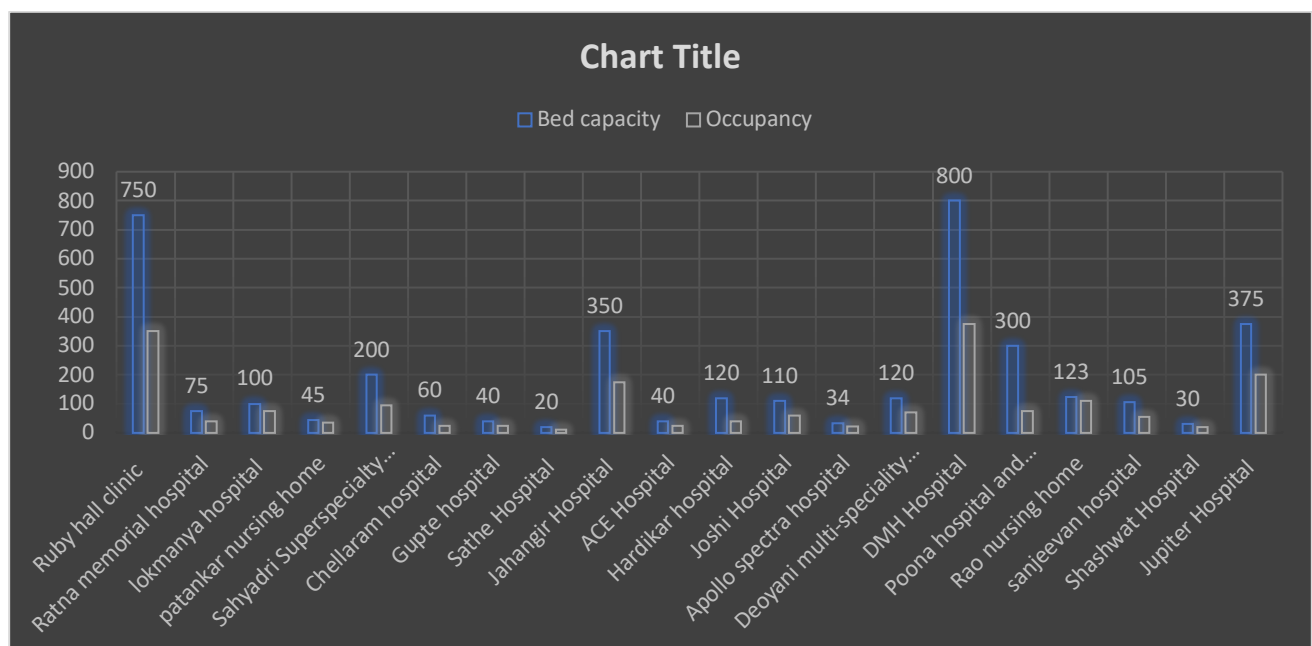

In this competitor's analysis we have covered different variable such as.

- Number of bed
- Occupancy
- Number of Ambulance
- Number of Key consultant
- Number of Speciality
- IPD frequency
- OPD Frequency
- Consultation charges

Competitor's Analysis Based on Various Factors:

1. Beds Capacity and Occupancy

Let's see Competitor's Analysis of Multispeciality hospital on the basis of number of Beds and Occupancy,

- ◆ If we can see in the above table, the highest number of the Bed is in DMH Hospital which is about 800 beds.
- ◆ Bed Occupancy of DMH Is about 375 Beds and this is the only one hospital which is on top in term of all categories.
- ◆ Name of Hospitals with 100+ beds capacity are,

- ◆ Also above Hospitals are top competitors of Sahyadri Superspecialty Hospital

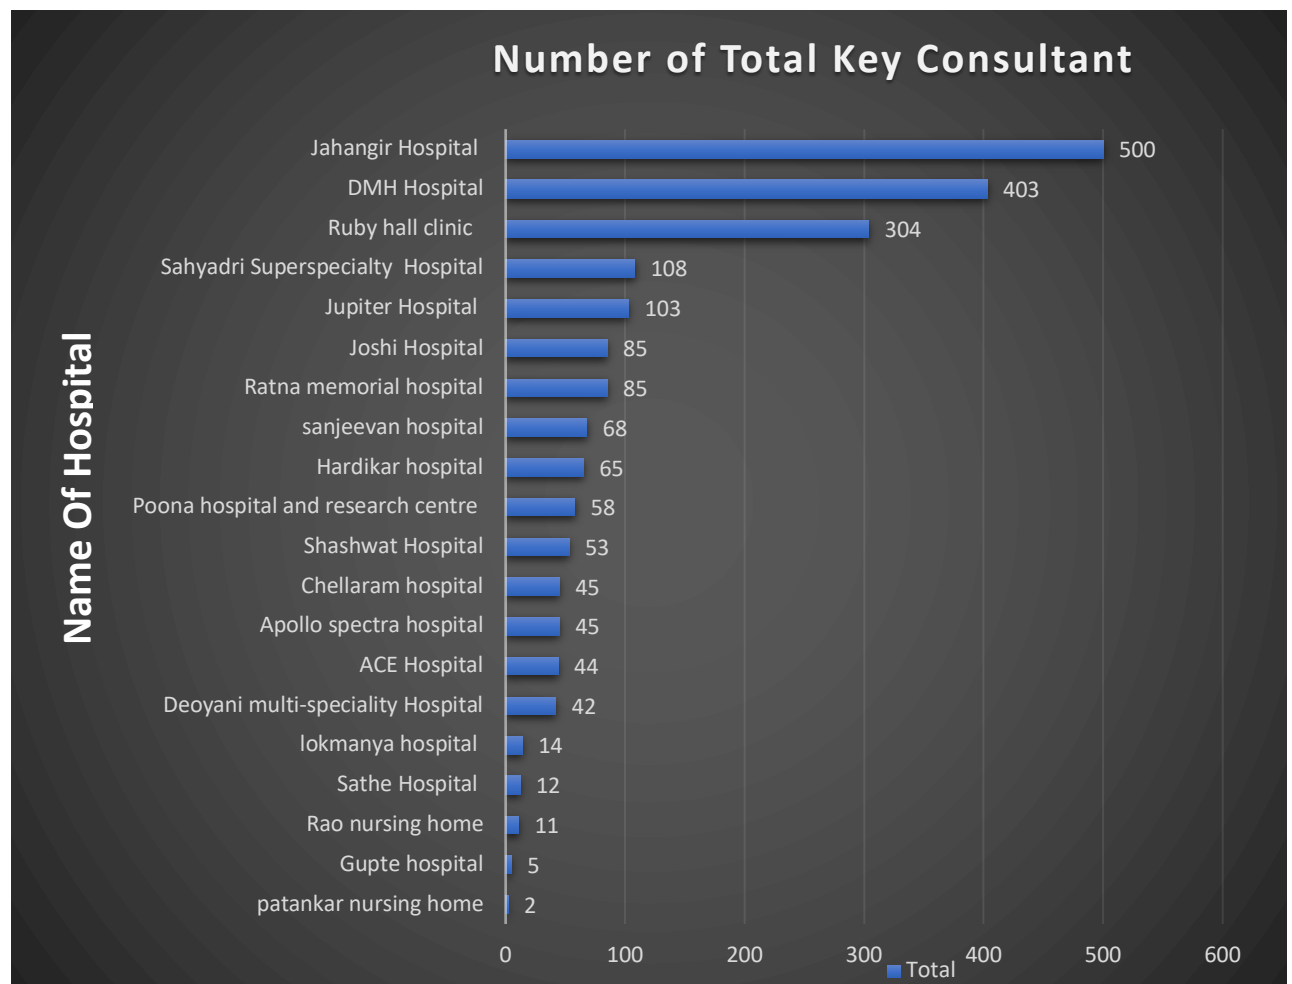

Let's see competitor Analysis of multispecialty Hospital based on Number of Ambulance.

- We can see, ambulances are the integral part of hospitals in case of emergencies. Having own ambulances or hiring from another body can add lot of benefit for the hospital and will result into improved patient satisfaction.
- Here, Ruby hall clinic has the highest number of ambulances as compared to other multispecialty hospitals and also the Sahyadri Superspecialty hospital which has 3 ambulances.
- In case of any emergency situation, Sahyadri Superspecialty Hospital hires ambulances from third party.
- If we see the number of ambulances in nursing homes, only Patanakar nursing home has 2 ambulances and Rao nursing home, Usha nursing home hires ambulances from third party whenever there is any need.

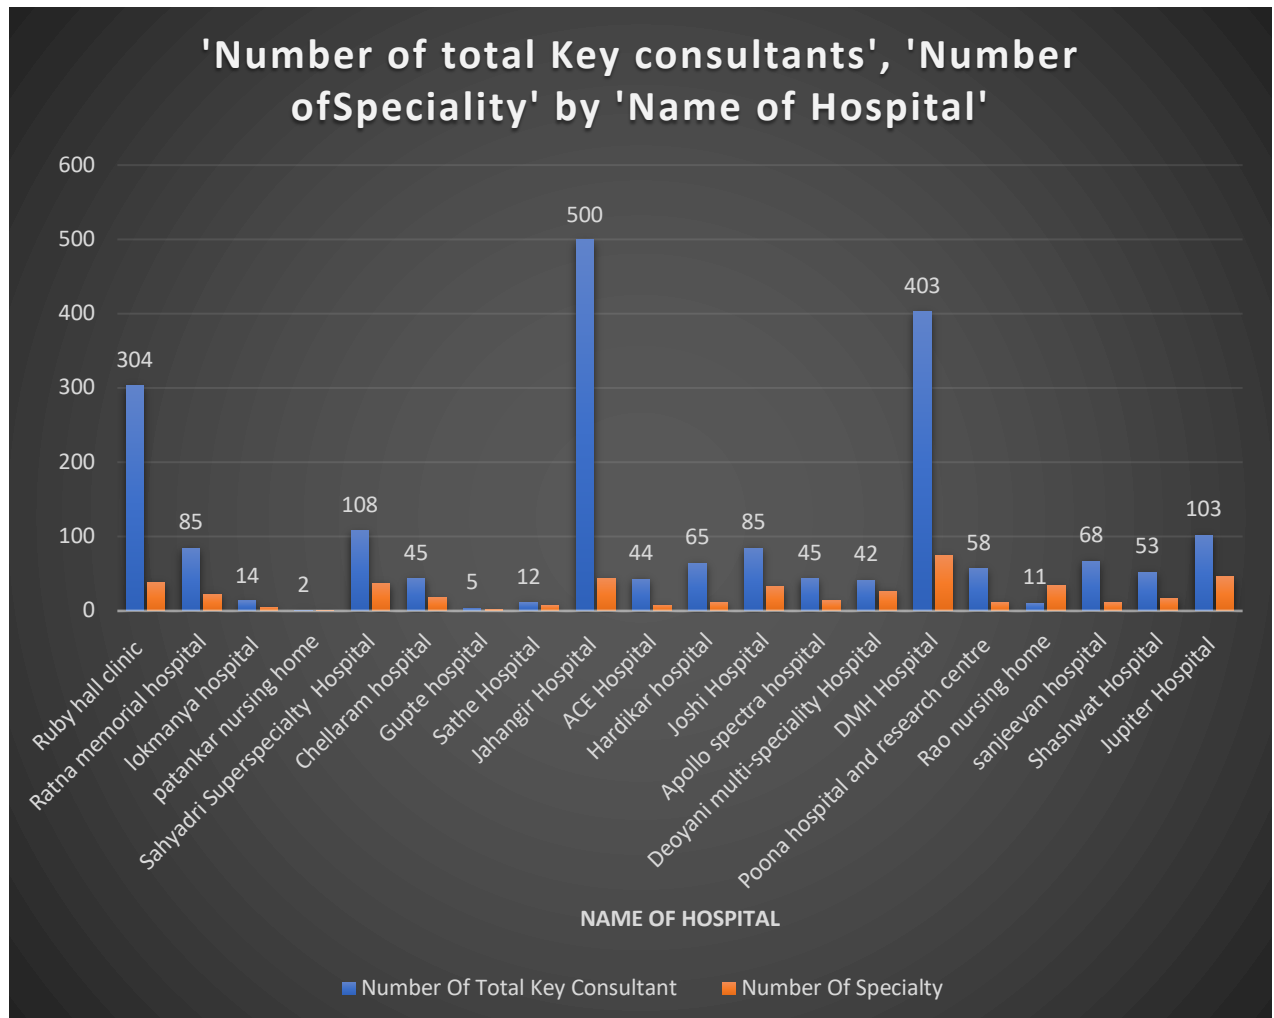

3. Key Consultant & specialty

Let's see competitor Analysis of multispecialty Hospital based on Number of Key consultant and specialty.

- As the key consultants are the one who use their knowledge and skills to diagnose and treat the patients while retaining ultimate responsibility, they are the heart of hospitals.

- Patient satisfaction is majorly based on the consultants' services.
- Here, we can see Jehangir multispecialty hospital is the one with highest number of key consultants that is over 500 key consultants are present in it.
- Second (403 consultants) and third highest (304 consultants) number of key consultants are in DMH Hospital and Ruby Hall Clinic respectively.
- As compared to first 3 hospitals, Sahyadri Superspecialty Hospital is really doing well to provide its best services to the patient with over 108 key consultants.
- In all the 3 nursing homes, Rao nursing home has highest number (11 consultants) of consultant than the other 2 nursing homes.
- Whereas Patankar nursing home has the lowest number of consultants that is 2.

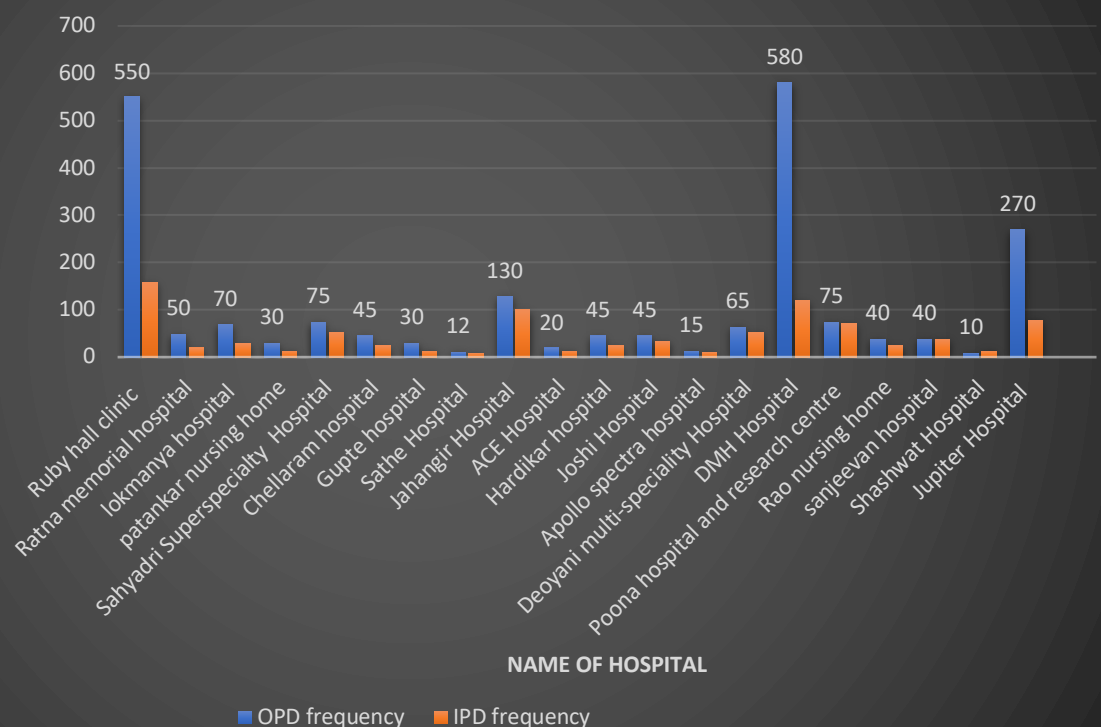

If we do comparative analysis by taking number of key consultants and number of specialties, then Jehangir hospital, Ruby Hall Clinic and DMH Hospital has the highest number of key consultants along with high number of specialties. After that comes the Sahyadri Superspecialty hospital.

4.Number of OPD Frequency and IPD Frequency

Let's see competitor Analysis of multispecialty Hospital based on Number of OPD Frequency and IPD Frequency.

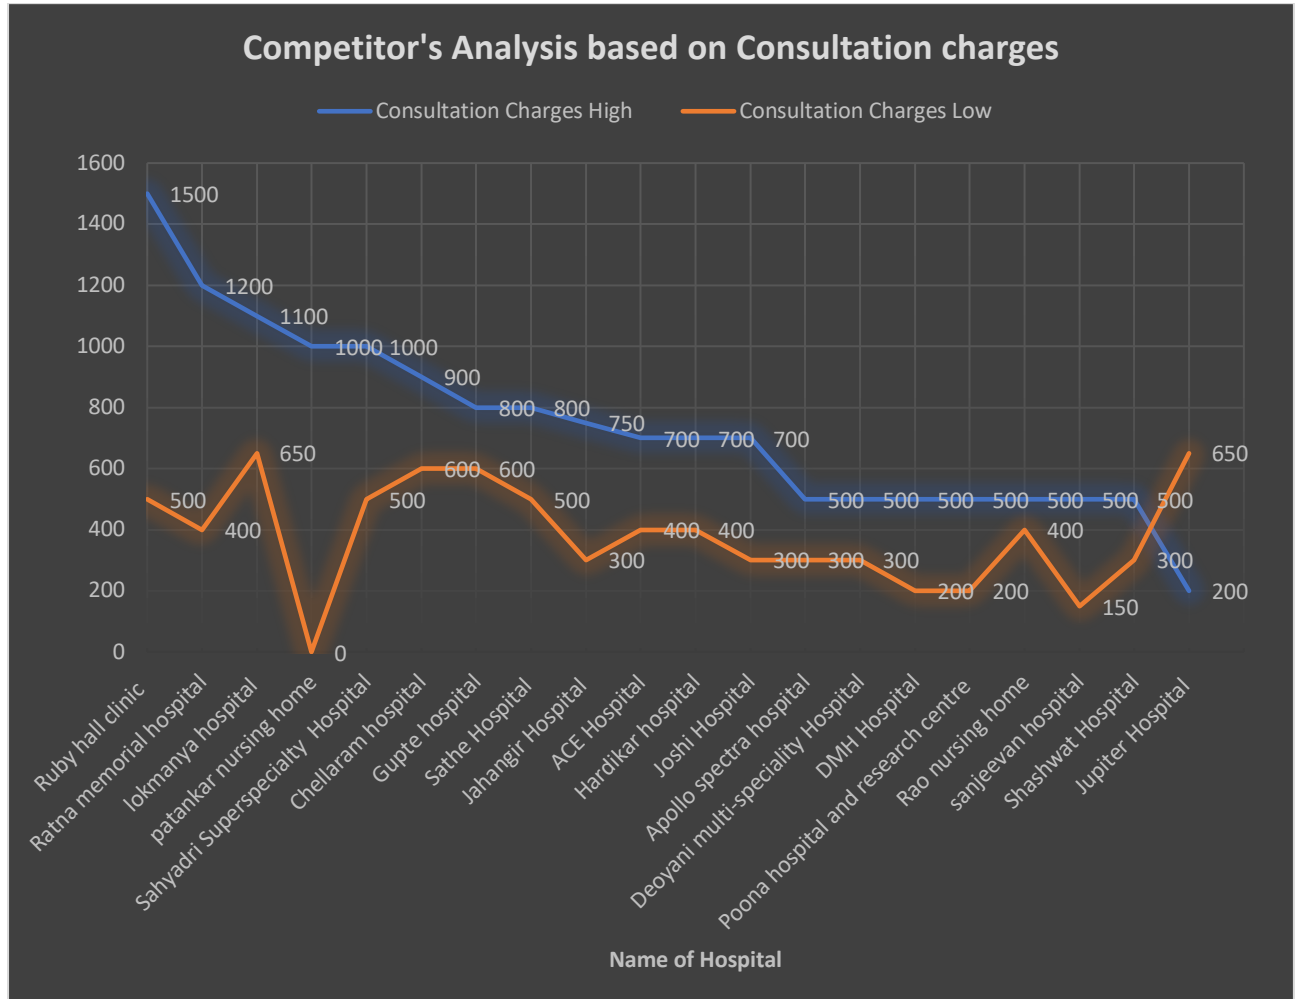

'OPD frequency', 'IPD frequency' by 'Name of Hospital'

- Ruby Hall clinic has the highest number of OPD and IPD as compared to Sahyadri Superspecialty hospital, Jehangir Hospital and DMH Hospital.
- As the number of OPD varies per specialty. So, there might be few variations in OPD and IPD per specialty.
- From the data we collected Ruby Hall Clinic comes under busiest hospitals than Sahyadri Superspecialty hospitals and other top hospitals.

5.Consultation Charges

Let's see competitor Analysis of multispecialty Hospital based on consultation charges.

- Consultation charges plays a hidden role for the patients who are near BPL and for lot of people. Due to high consultation charges many patients might change their decision and can choose the cheaper one. And in some cases, patient won't mind paying for higher consultation charges if they are getting high quality of patient service in return.
- Here, blue line shows highest consultation charges whereas orange line shows lowest consultation charges offered by the respective hospitals.

Competitive Landscape (SWOT)

Parameter	Ruby Hall Clinic	DMH	Sahyadri Superspeciality Hospital
