Organizational Structure

Theoretical Exposure

- Identification of gaps in the documentation of the clinical pathway of CABG using NABH checklist
- Indicators for Auditing the live MRD documentation of wards and ICU department on daily basis: time, initial and final assessment
- Documentation of care plan including nursing care, , nutritional needs of the patients, consultant's name

Practical Exposure: CABG Study

A coronary artery bypass graft (CABG) is a surgical procedure used to treat coronary heart disease. It diverts blood around narrowed or clogged parts of the major arteries to improve blood flow and oxygen supply to the heart.

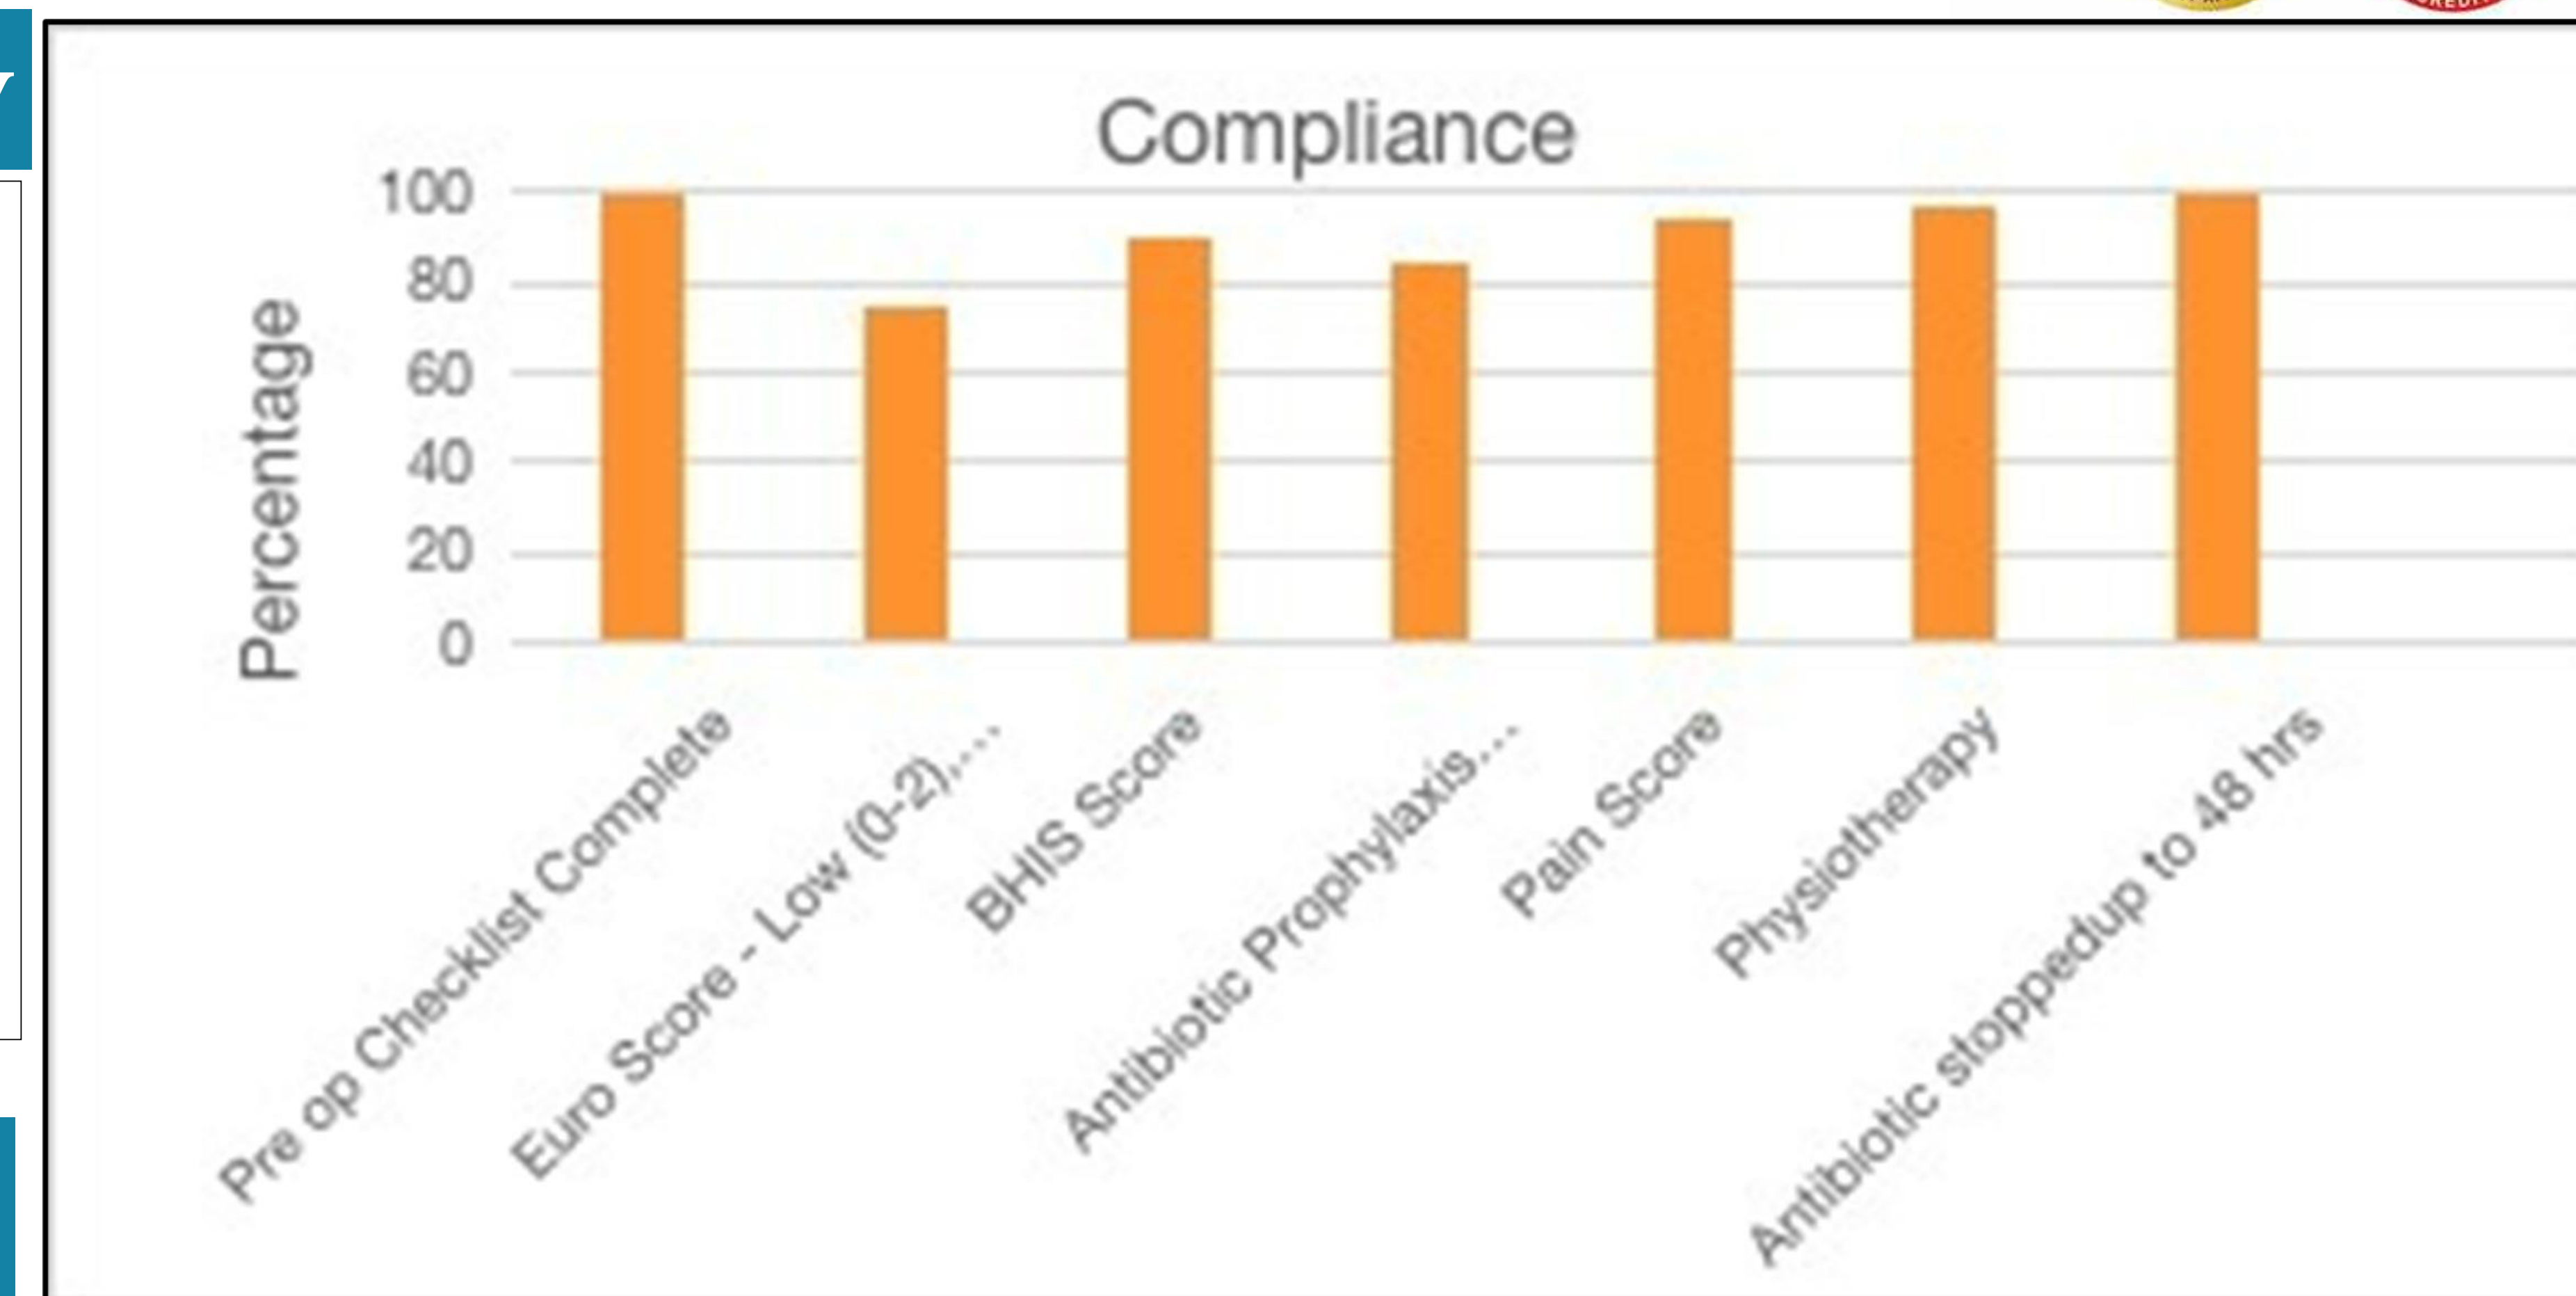

STUDY ON CORONARY ARTERY BYPASS GRAFTING (CABG)

A retrospective analysis conducted for medical record of all (80) CABG patients during Jan–March 2022 with the objectives

(i) To study management practices of CABG; and (ii)to calculate the compliance of CABG.

Data abstract from the discharge file of 80 CABG patient was taken from the following parameters–

- Summary of the procedure
- Medication Sheets
- Vitals sheets
- Nursing assessment sheet
- Device insertion sheets
- Physiotherapy sheet

The reason for the drop-in compliance rate –58% Drain removal in POD- 2 ; 69 % Foley's Catheter Removal ; 82% Antibiotic prophylaxis (Cefuroxime 1.5mg)

SWOT Analysis

<u>STRENGTH</u> Competent staff Cardiac patient care Quality accreditations	<u>WEAKNESS</u> Patient perceived fortis as expensive hospital
<u>OPPURTUNITY</u> Highest burden of cardiovascular diseases	<u>THREATS</u> Competition, prohibitive healthcare costs

Suggestions

Complete documentation of Drain removal in POD (0&1), Foley's catheter removal, Antibiotic prophylaxis, Inj Morphine 3mg Iv 4hrly in POD-0 to be done.
