

Organization Profile

Sawai Man Singh (SMS) Hospital is one of the largest government healthcare institutions in Rajasthan. located in Jaipur, a vital medical hub, catering to a vast population. With around 6,500 beds, and over 65 DDCs. It operates as a multi-specialty center, and affiliated hospitals, provides free or subsidized healthcare services to patients from all walks of life.

Objective: Medicine Shortage At Sms Hospital.

MOST STOCKOUT DRUGS AT SMS

DRUG NAME	PATIENT COUNT
pantaprazole	5000
methotrexate	2000
metformin	8000
risperidone	500
calcium	15000
vitamin	15000

My Role During Internship	Suggestions
• Identifying causes of delayed medicine supply • Evaluating supply chain workflows • Assessing cold chain and emergency logistics	• Shortlist frequently stocked-out drugs • Enhance coordination between DDCs and procurement team.. • Digitize emergency drug purchase orders.

Methodology	Findings
Site Visits: Observed inventory and dispensing. System Use: Hands-on with IHMS for drug entry, stock tracking, and indenting. Process Mapping: Monitored procurement, restocking, expiry handling, and returns. Gap Study: Compared real-time practices with theoretical	Manual Overload: Manual entries still common despite digital system. Stockouts Frequent: Due to poor forecasting and delayed procurement. Cold Chain Gaps: Missing equipment and temperature control. Staff Shortage: Limited trained manpower and IHMS skills.
