

To analyze gap between physical achievement and financial expenditures on beneficiaries on the basis of JSSK entitlements.

INTRODUCTION:-

Government of India has launched the Janani Shishu Suraksha Karyakaram (JSSK) on 1st June, 2011. The scheme is to benefit pregnant women who access Government health facilities & accredited hospitals for their delivery. Moreover it will motivate those who still choose to deliver at their homes to opt for institutional deliveries. All the States and UTs have initiated implementation of

OBJECTIVE:-

To analyze gap between physical achievement and financial expenditures on beneficiaries on the basis of JSSK entitlements.

RESEARCH QUESTIONS:- ➤ What is the level of utilization of service against expected utilization of services among beneficiaries. ➤ What is the possible cause of gap between physical and financial performance.

RESEARCH METHODOLOGY:-

Study Design:-

The present study will be based on secondary data.

Study duration :- 2 months.

Study Area:-

The respective study will be based on secondary data so we took data of all district of Rajasthan state.

Study Respondents :-

Secondary Data of Janani sishu suraksha

Drug and Consumable /total delivery

Diagnostic Services /total delivery

Free Transportation

Fresh and Warm Food

Free Blood Transfusion

Financial analysis

Utilization of budget approved in PIP

CONCLUSION :-

1. Lack of quality care in government health facilities could be possible reason.
2. Misconduct of hospital staff could be another possible reason.
3. Lack of utilization of transport facilities
4. Frequent referral from government hospitals could again be reason.

Recommendation:-

1. Free drugs and consumables schemes is already under process but most of the ANC & PNC's cases goes unreported. So it is important that report or record of drugs & consumables as well as diagnostics given to beneficiaries should be maintained separately and should be reported separately.
2. For assured referral transport there is already integrated ambulance facilities is present.
3. By including more hospitals in accreditation could help beneficiaries in reaching health facilities on right time and increasing bed numbers could also help in handling large volume of cases
