

To Assess The Changes In Knowledge And Practices Of ANM's Regarding E-IMNCI After Conducting A 2 Day Long Training

INTRODUCTION

The National Rural Health Mission (NRHM) is an initiative undertaken by the government of India to address the health needs of under-served rural areas.

Bringing down infant and child mortality rates and improving child survival has been an important goal of the national programmes of INDIA.

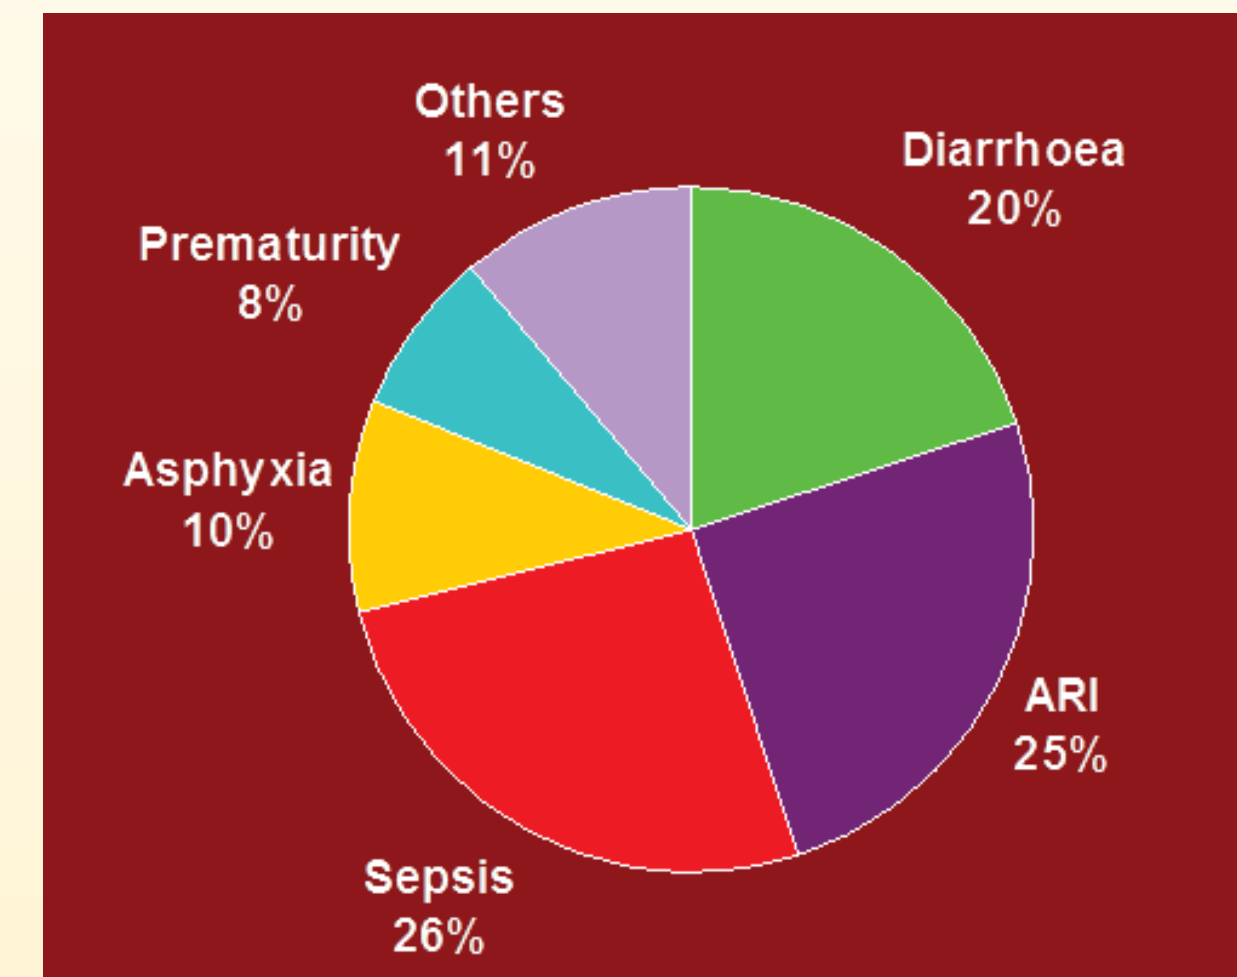

OBJECTIVES

- To assess the changes in the knowledge and practices regarding IMNCI after conducting a 2 day long training with IMNCI e-learning package.
- To compare the knowledge, skills and programme implementation of IMNCI e-learning trained persons with the conventionally trained IMNCI persons.

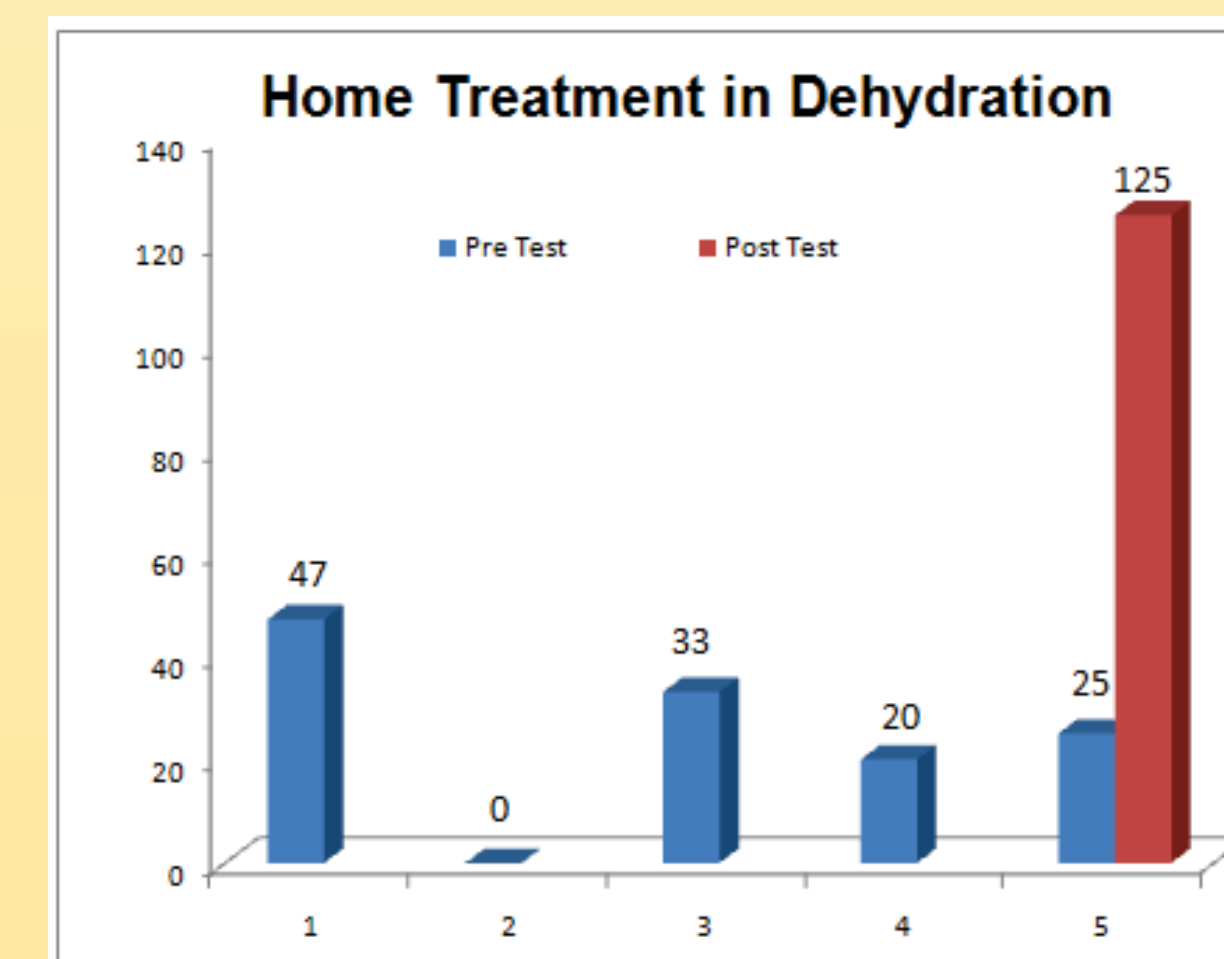

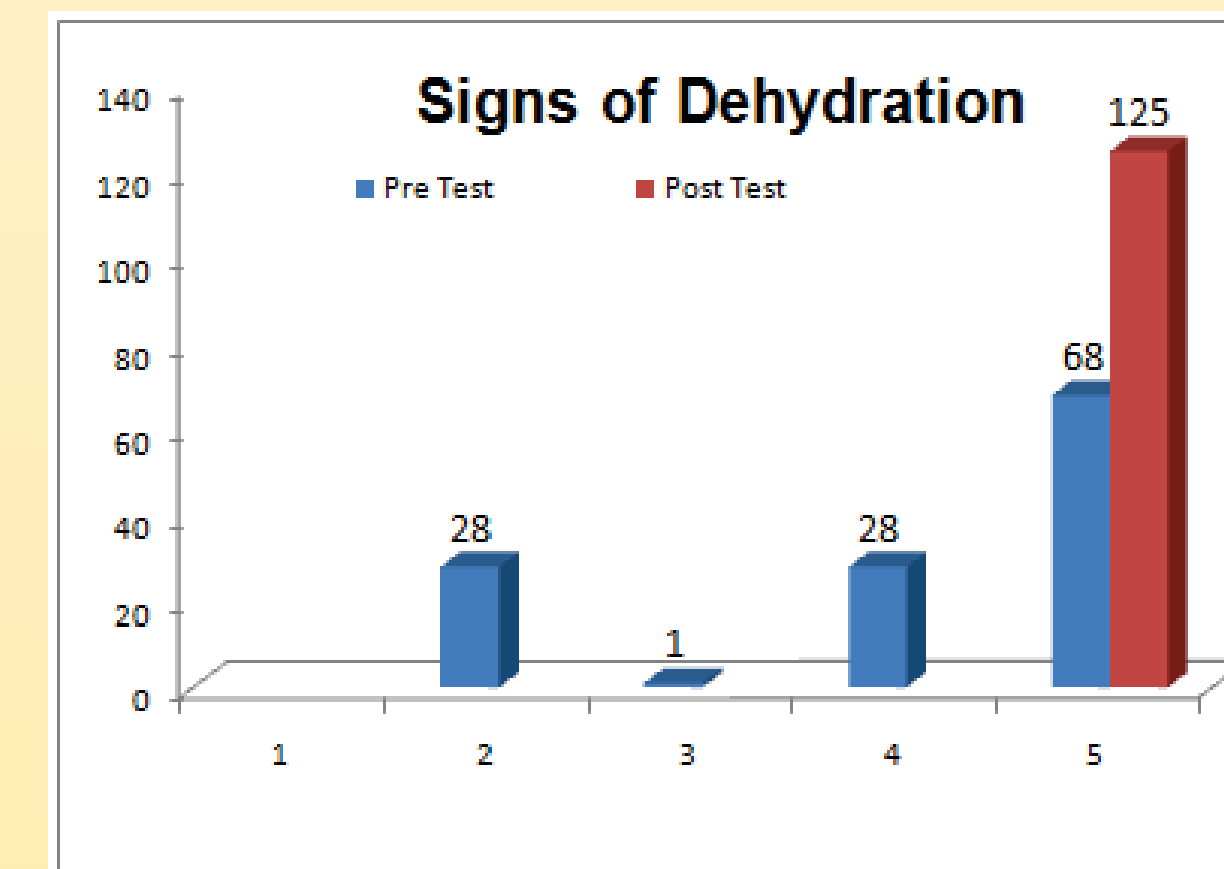

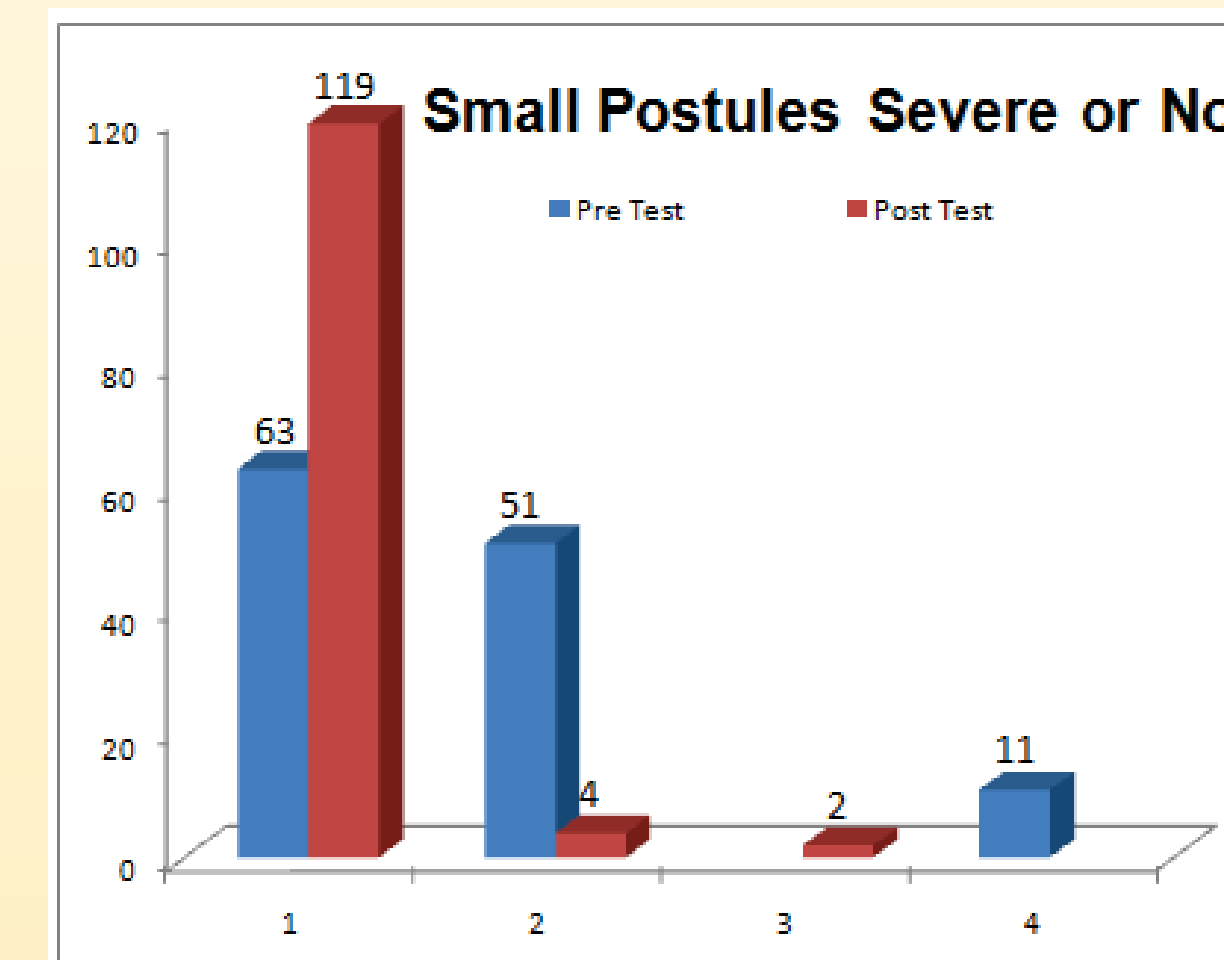

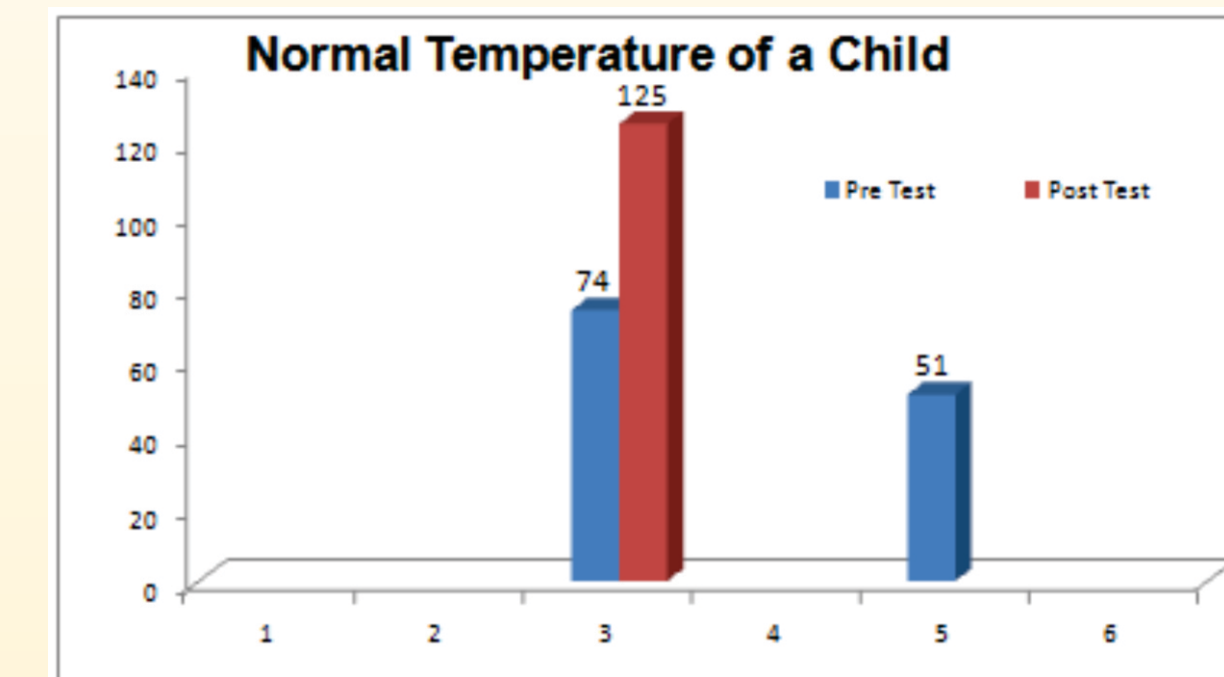

METHODOLOGY

- Study population:** A sample of ANM's randomly selected in district Yamuna Nagar & District Palwal of the state Haryana.
- Study design:** Comparative cross sectional survey.
- Study tools:** Data will be collected through the questionnaire and video based pretest and post test.
- Sampling method:** All ANM's in the district will be included, as this will be a refresher training and all ANM's will be reoriented irrespective of previous training status. But only few of them will be included in the study. The sampling will be done of the Sub centers to ensure variability. If two ANM's would be present in the sub center, one of them will be conveniently selected.
- Sample Size :** Approx 230.
- Study Design And Data Collection :** The total no of CHC areas where IMNCI e-learning trainings would be held will be the evaluation centers. The data will be collected with pretested structured questionnaires.

Causes of Deaths

FINDINGS

RECOMMENDATION

- Outpatient facility based.
- Training of ANM's and MO's at regular intervals
- ANM's should followup the referral cases
- Availability of medicines at the SC's and PHC's.

OBSERVATIONAL LEARNING

- Showed IMNCI videos to ANM's and helped them to operate IMNCI application and fill data in it individually.
- Help them understand how to treat and diagnose the patient and refer them accordingly.
- Monitored the launch of rota virus vaccine.
- Taken pre - post test of IMNCI training paper.
