ABOUT THE BOOK

Recent advances in electronic information and communication technology have changed the complexion of today's libraries and information centres in a big way. With the advancement in the automation and computing systems in the knowledge society, a significant change in library services can be seen. The modern library is serving its hybrid services which are gradually moving towards the electronic one. In the context of changing information scenario, there is an urgent need to comprehensively review the developments and the issues to assess the impact of information technology on library and information services. There is also need to review the ICT developments and challenges in terms of skill sets and the human resources required for managing these changes as well as the training required for this purpose.

Keeping these perspectives and issues in mind the 12th MANLIBNET convention was organized in association with Institute of Health Management Research, Jaipur, on November 22-24, 2010 and invited contributions from professionals for presentations and proceedings. The response to the call for papers has been very encouraging from all parts of the country. The papers received include case studies, research reports, survey reports, trend reports and research reviews. These papers were reviewed for publication in the conference volume. Based on the recommendations of the editorial committee, the content in the conference volume was limited to 67 full-length papers.

The papers comprising in this volume cover all important topics and are relevant to the theme of the conference. The volume provides the vision for shaping the future libraries.

The contents are broadly divides into six major areas for easy identification and analysis of the major facets of the convention. Starting from the emerging technologies in libraries to the best practices in libraries, web 2.0 tools and techniques, web resources, e-learning, social networking, quality of information, stress management etc. are covered in this volume.

The dynamic research potential of many authors was self-evident from the diversity of the subjects they have covered and analysed in their papers. Editorial board members have embarked on the mission of editing this volume. It is also confronting to see that the entire spectrum of themes outlined for the convention objectives were adequately covered by the contributors.
