Institute of Health Management Research
MBA Hospital and Health Management
Batch-21 (2016-2018)
First Year
Research Methods
Term Examination

Time - 3 Hour

MM-70

*The question paper contains 1(one) printed page. All questions carry equal marks.
Attempt any 5 questions*

- Q1. What are the different types of research questions? Discuss their possible sources.
- Q2. What is inductive and deductive approach? Please elaborate on differences between quantitative and qualitative methods?
- Q3. What is sampling? Please elaborate on different types of probability sampling methods?
- Q4. Discuss the concept of validity and reliability. How are they important in research?
- Q5. Write short notes on any two:
1. Uses and limitations of different types of analytical studies
 2. Research process
 3. CAPI & PAPI
- Q6. Association between fatigue among overworked staff and medical errors have become an area of concern. A corporate hospital wishes to estimate the proportion of medical errors which could be attributed to fatigue. Informal discussions have revealed that almost 40-45 percent of the medical errors were committed by nurses working for double shifts. Management wishes to conduct a quantitative study among entire nursing staff of 1500 to clearly identify the reasons. Please suggest an appropriate research design and sampling procedure for the same.
